# WELCOME TO OUR ANNUAL FEBRUARY 2022 ALBANY SALE

**ANOTHER EXCITING YEAR OF LAWSONS  
ANGUS BULL SELLING KICKS OFF IN WA  
ON THE 2ND OF FEBRUARY 2022. 100  
18-MONTH OLD BULLS SELL WEDNESDAY  
1<sup>PM</sup> FEBRUARY 2<sup>ND</sup> 2022 AT “YOOLBERUP”,  
605 FISHTRACK ROAD, MANYPEAKS, WA  
JUST NORTH OF ALBANY.**

These boys are in a league of their own in terms of multi-trait excellence.

This year's Albany Sale will be under the same Helmsman on-line format as last year and the Albany Yearling Sale in May 2022 will be on Auctions Plus. The Sale will be a conjunctural sale between Elders and Independent Rural Agents (IRA). People are welcome to attend and bid on-line from the farm at Many Peaks on Sale Day and/or inspect the bulls prior to the Sale by appointment.

Bulls are catalogued in their respective sire-groups and sorted by tag within these groups. Under the helmsman on-line system you can bid on as many bulls as you like at the same time and change bulls if some go beyond what you are prepared to bid for. It is a very buyer friendly system for those that have not used it before.

Please note we are not holding our Joanna Plains, Cataby, Bull Sale this year. Given the difficulties and travel restrictions we decided to simplify our sales program and hold both bull sales at Albany this year. The yearling Bull Sale is to be held on Friday May 6th 2022 and we expect to be offering 50 bulls in May so clients will still have plenty of options in 2022. We do value those clients that have purchased bulls from Joanna Plains over the past few years and hope you will continue to source your bulls from our Albany Sales. We thank Johnnie Dichiera and the Central Agri Group (CAG) team for their continued support in both WA and the east coast.

Please call us in terms of inspecting bulls and we will continue to assist with the costs and delivery logistics for your bulls no matter where you are located in WA.

These boys really are in a league of their own in terms of multi-trait excellence, high performance in a sensible maturity pattern. The new Indexes confirm these claims, but more importantly, the commercial results from our clients and our own carcass results in our Low Carbon Beef branded beef trials confirm this.

Feature sire GAR Ashland (50 sons sell)

GAR ASHLAND is this years' feature sire with 50 sons selling! Ashland is an incredible calving ease, high growth sire, with moderate stature and loads of muscle. Ashland is the sire of the famous GAR Home Town who sold at the Gardiner Angus Ranch in 2020 for the record price of US\$475,000 and who is also being widely used in our program.

Momentous is the only sire in the Angus breed >5 IMF, >12 EMA and >110 600D, he was the highest MSA Marble Score sire-group with his 10 steer progeny in Cohort 9 of the Angus Sire Benchmarking Program (ASBP) and our own carcass trials have seen many >7 marble score carcasses on the rail with only around 120 days on feed.

Momentous (10 sons) and his sire Momentum (12 sons) combine well for the third sire-group mob. These two carcass giants take the Angus breed to another level.

**LAWSONS MOMENTOUS M518** is currently the #2 most widely used bull in the breed and compliments many of our other sire groups. Momentous bull calves have been breaking records across Australia, we have over 1,000 of his 2,500 registered calves so in our program giving you the power numbers to select from with superior genetics at an affordable price. It was pleasing to see his spread between 600D and Mature Cow Weight (MCW) widen with his MCW now +82 and well below breed average of +98.

Apart from Momentous' unmatched multi-trait excellence his calves are wide-topped, thick set with exceptional docility and structure. We now have 3-year-old Momentous cows in the herd doing a superb job.

## BULLS THAT SELL

### ALBANY

CODE	SIRE	# PROGENY
ASH	GAR Ashland	50
BON	GAR Bonfire	1
RL	GAR Reliant	1
GEN	GAR Genuine	14
MON	Te Mania Montalto M1314	8
G10	Alloura Get Cracking G10	4
M518	Lawsons Momentous M518	10
MM	GAR Momentum	12
<b>Total</b>		<b>100</b>

**Sale bulls are sired by sires we regard as the best balanced performance sires in the Angus breed on a global basis.**

This Sale also features big sire groups from GAR Genuine who was one of the sires we selected on our last trip to the US, exceptional calving ease and growth and a good outcross option for all our clients. Alloura Get Cracking G10 has played an important role in our breeding program; his legacy will be his moderate, functional low maintenance daughters that are deep bodied with capacity and loaded with carcass potential to help take us to the next level of maternal efficiency and end-product value.

Te Mania Montalto M1314 is one of those bulls that slips under the radar, he's a problem free, no holes bull with exceptional calving ease (+10 DIR) sire, very sound quiet disposition, moderate growth and maturity pattern with excellent carcass traits. Montalto's sire has been used widely across Australia, Montalto is more moderate for Mature Cow Weight (MCW) than his sire and has nearly 400 calves registered now so is high accuracy and recommended as a good outcross.

All 100 Sale bulls rank at the top end of the Angus breed on many levels including:

- 90/100 (90%) of bulls have a calving ease tick ✓ meaning they are ideal to mate with heifers and 75/100 (75%) are above breed average (2.0) for Calving Ease Direct (DIR)
- Top 35% for Calving Ease Direct (DIR) and lowest 20% for Birth Weight (BW)
- Top 4% of the breed for Heavy Grain Fed Index (\$GN) and top 3% for Domestic Index (\$D), Angus Breeding Index (\$AI) and Heavy Grass Index (\$GS)

\$GN	\$A	\$D	\$GS
<b>357</b>	<b>262</b>	<b>215</b>	<b>248</b>
4%	3%	3%	3%

- Top 15% for 400D Growth and top 30% for 600D Growth
- Below Breed average for Mature Cow Weight (MCW) with +96 vs breed average of +97
- Top 8% for marbling (intramuscular fat)
- Top 5% for Eye Muscle Area (EMA)

**Bulls are more than just good numbers – backed by a great team of people**

Bevan and his team have done a superb job developing these bulls, operating his intensive grazing system around everything else he needs to get done. It just shows what can be achieved with efficient genetics and skilled pasture management. Large mobs of bulls take some careful observation and it's been fantastic having these bulls under Bevan's watch and system. It's a balancing act between pasture utilisation, animal performance and animal behavior, these boys learn to compete on a daily basis for grass and we get to measure and monitor how they perform on the journey. We have another 700 bulls this side of Australia by the same sires and we have just AI'd their 400 siblings and

the 800 mature cows so I have a good handle on what these boys are and where they fit in the Angus breed. In fact the WA boys are looking better than the Eastern boys over here at this stage!

The sale bulls really are in a league of their own and like Bevan keeps saying they are like peas in a pod from a visual perspective, so you have lots to pick from and fantastic opportunities to take your herd to the next level.

**ESTABLISHING OBJECTIVE BREEDING GOALS AND GETTING YOUR EYE ON THESE EBVs AND NEW \$ INDEXES SHOULD BE PIVOTAL TO ANY SELECTION CRITERIA ALONG WITH VISUAL ASSESSMENT FOR TRAITS LIKE STRUCTURE, CONFORMATION AND TEMPERAMENT.**

Our raw data from birth all the way through the animals life, ultrasound scan data, actual carcass data and mature cow weights, along with some genomics are all best analysed and standardised to produce highly accurate and meaningful rankings through their Estimated Breeding Values (EBVs).

The reason we like to include comments around percentile bands is it hopefully helps give clients an understanding of where these bulls sit in comparison to other Angus bulls. The EBVs can often be seen as abstract numbers to some, but they are the best and only meaningful guide as to what the underlying genetic potential of these bulls are which is what will drive your genetic progress. The important thing is to understand what this means in your herd, to understand where you are and where you want to be for key traits like calving ease, growth and mature cow size.

**We have always said growth is important and kilograms of beef per hectare drives commercial profitability (amongst other things), but growth needs to be in the right package and balanced with cow size and ability for the cow herd to withstand the tough years. Based on last year's bull sales, we are the only major Angus stud in Australia that are now below average on Mature Cow Weight (MCW),** such is the breeds thirst for more growth.

**Update on Lawsons Angus and future plans for Western Australia**

In terms of our plans going forward in WA, as many of you know we sold our "Woolahra" farm at Hopetoun, WA in 2020 and we have purchased Cobwell Station at Barham in the Riverina, NSW. Cobwell Station is located on the Wakool River and is an ideal property to continue to run our nucleus breeding herd. The future bulls for WA will be bred mainly from Cobwell Station and then sent to Bevan at weaning. We are committed to offering the best Lawsons Angus genetics we have to our WA clients..

Cobwell Station has a good balance between open grazing and forest country and will be our next challenge in developing the pastures and infrastructure to better manage the herd and make our large scale AI

programs easier on the cattle and people! This year we achieved our goal of 90% pregnancy of our 1,200 head NSW nucleus herd in 45 days with 100% AI.

Claremont at Yea, about an hour north of Melbourne continues to be our east coast headquarters, bull development and marketing unit and research centre for the business.

We also continue to run some cows in Victoria and have over 1,000 cows run under our cooperator herds in WA, NSW, Victoria and Tasmania (King Island). These cooperator herds are an important part of our business and are operated by very good people with a high level of integrity and passion for what they do.

Although for me personally the Covid-19 travel restrictions have provided me with the opportunity to spend more time with the family and in a hand-on role setting up our new farm and in the important breeding cycle, I genuinely miss the interaction with our clients. Writing this catalogue introduction is my attempt to try and communicate some of my thoughts that we would normally get to discuss and debate over the course of a farm tour!

Many thanks to Bevan and Bec Ravenhill, all our friends and supporters in WA that continue to support us and work with us to find new frontiers in the efficient production of high quality beef.

Regards,

A handwritten signature in white ink that reads "Harry Law".

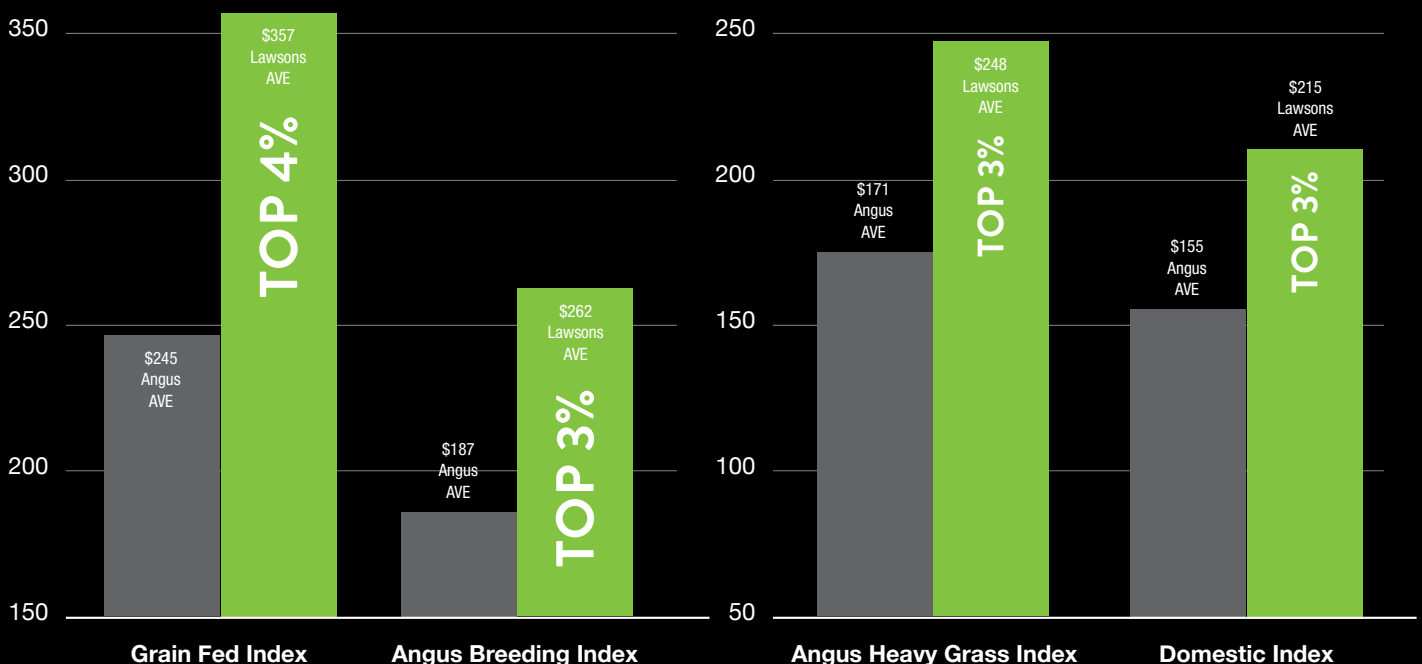

**Opposite:** Congratulations to Col and Kerrie Thexton, Independent Rural Agents (IRA) on an outstanding 30th Annual Sale. Your pursuit of excellence for your clients and understanding of the value of genetics in all parts of the supply chain is highly commendable.

# HOW DO **LAWSONS ANGUS ALBANY BULLS** COMPARE TO THE ANGUS BREED AVERAGE?

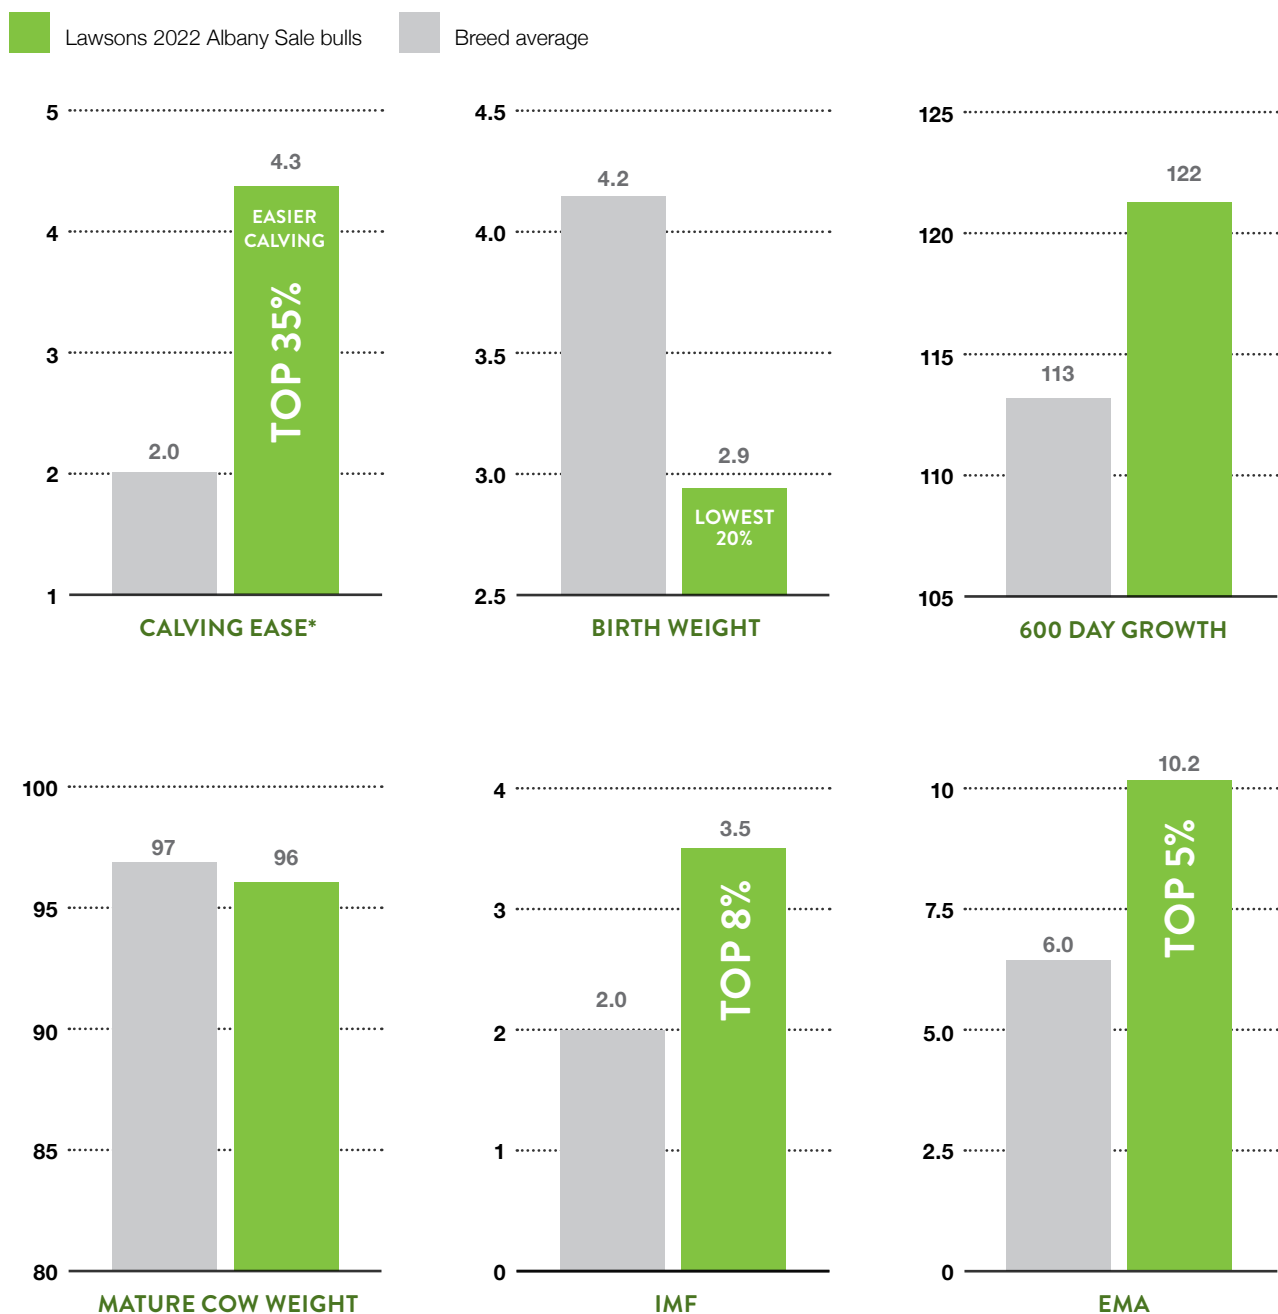

THESE ALBANY SALE BULLS EXCEL ACROSS ALL KEY ECONOMIC TRAITS. THEY ARE UNIQUE IN THEIR BALANCE OF CALVING EASE, HIGH GROWTH, MODERATE COW SIZE AND UNMATCHED MUSCLE AND HIGH MARBLING POTENTIAL.

■ Lawsons 2022 Sale bulls
 ■ Breed average

# HOW DO LAWSONS ANGUS WA SALE BULLS COMPARE TO THE ANGUS BREED AVERAGE?

# SELECTION FOR FEED EFFICIENCY

**OUR VICTORIAN FARM AND HEADQUARTERS INCLUDES OUR VYTELLE (FORMERLY GROWSAFE) FEED EFFICIENCY TESTING AND RESEARCH STATION.**

**We have now been testing bulls for over two years and have established a very good baseline data set and have the ability to rank all current sires for a range of feed efficiency traits, including Net Feed Intake (NFI).**

This data is included in Vytelle's global genetic evaluation analysis so we can see where our bulls fit in the global population. We have also used linked sire to the Angus Sire Benchmark Program (ASBP).

We will continue to test cohorts and utilise this information in our breeding decisions. Long term we believe we can improve net feed efficiency (NFI) by 20%, which will be important for our cost of production but also to reduce our greenhouse gas (GHG) emissions as part of our longer term business and genetics plan.

We are the only Angus stud in Australia that have their own on-farm testing station and have made a good start at shifting the bell curve in feed efficiency. Measuring and evaluating the economic impact of genetic change when we put selection pressure on feed efficiency is an important competitive advantage for Lawson Angus now and in the future.

Above: Bulls feeding through the Vytelle system at Claremont

We are measuring significant variation and differences between sires and individual bulls and we recognise there is lots of room for genetic improvement in this independent trait. Please call us to discuss further if you are interested in finding out how we are incorporating feed efficiency into our long term breeding program.

---

**“IF YOU DON’T MEASURE IT,  
YOU CAN’T MANAGE IT.”**

---

This feed efficiency technology was a significant investment for us and part of a long term strategy to put selection pressure on feed efficiency.

**FOR US THIS IS THE MISSING LINK IN IDENTIFYING CATTLE THAT USE FEED (ENERGY) SMARTER.**

We know our cattle are at the top of the breed for feed:gain (feed conversion efficiency) and the next step is to identify cattle that meet our tough multi-trait criteria but are also good at Net Feed Intake (NFI). Our GrowSafe system allows us to weigh animals on a daily basis as they drink, so we not only record daily feed intakes we also get weight performance in real time. This is the feedback that has been lacking in beef systems and sets our genetics apart.

We have been able to rank sires and see where they fit in the global Angus population and we are using this information in our mating decisions going forward. The good news for beef farmers is selection for feed efficiency aligns with on-farm productivity and also will help select for animals with a lower carbon footprint (lower emissions intensity).

In terms of genetics we see the ability to accurately measure what individual animals eat and their feed conversion rate as an opportunity to fine tune and rank sires for these important traits – Residual Feed Intake (RFI or NFI), Dry Matter Intake (DMI) and Feed Conversion (FC). We know our genetics (and those sourced from GAR) are amongst the most efficient in the Angus breed. Having this information allows us to make informed decisions about our breeding herd so you can improve the genetic progress and performance of your herd. We will use this data sensibly over time to ensure animals are accountable for what they eat, which is one of the most important factors in beef herds cost of production and profitability.

# IGNORE THE NOISE – STAY FOCUSED ON YOUR KEY OBJECTIVES

**AS I DISCUSSED WITH MARK GARDINER, GARDINER ANGUS RANCH, KANSAS, EARLIER THIS YEAR OUR PROGRAM (SAME APPLIES FOR GAR) IS BORING IN THE CONTEXT THAT IT IS HIGHLY PREDICTABLE, TRANSPARENT AND SIMPLY INVOLVES IDENTIFYING AND MULTIPLYING THE BEST BULLS WE CAN FIND IN LARGE NUMBERS.**

**Mark chuckled away as we agreed we are two of the most boring animal breeders on earth! Being disciplined and ruthless in our selection and culling criteria is how we, and in turn you, make consistent, predictable genetic progress, not by chasing one outcross after another. It may be boring to some, but it takes a lot of research behind the scenes, a strong global network and then a lot of hard work to implement. I often think how easy it would be to let the bulls out for a run after two big rounds of FTAI.**

---

**WE DO OUR PLANNED MATINGS AROUND WHAT WE THINK IS BEST FOR OUR COMMERCIAL CLIENTS.**

---

One of the big reasons why we don't have the big genetic spread (variation) across all traits is that we have not used follow-up natural mating bulls since 1994. We carefully consider every individual mating, taking into account not only objective data (EBVs, pedigree and inbreeding coefficients) we also use all our knowledge and observations that we make when working cows at calving and AI and on our daily rounds shifting breaks for bulls.

If you recall this time last year Angus Australia released a new version of Indexes that amongst other things put greater emphasis on Mature Cow Weight (MCW). This involved changing the economic weightings in the Indexes to reflect that MCW is directly related to feed costs and 70% of the costs in a cow-calf operation relate to the production of feed and supplementary feeding. This caused some major re-ranking of sires (in a good way to my way of thinking and economic analysis).

However it caused such a backlash on Angus Australia they were forced to withdraw the new Indexes and have only just released the latest assortment of Indexes in December 2022 (they were released earlier as trial Indexes). Angus Australia have released a low feed cost version of all the major indexes.

Above: Mark and Henry Gardiner, Gardiner Angus Ranch.

See below this extract from Andrew Byrnes in press release dated 26 November 2021 **“Introducing New Angus Selection Indexes”** (full version available on ASA web site).

**“Low feed cost versions of each selection index have been introduced to cater for Angus breeders who are running a production systems where pasture is not fully utilised for the majority of the year, or where the cost of supplying additional feed, via either supplementary feeding and/or increased pasture production, is low.**

**In these production systems, if there is an increase in the maintenance requirements of the breeding herd due to an increase in mature weight, minimal additional costs are incurred.**

**The low feed cost selection indexes do not consequently aim to limit an increase in mature cow weight, while improvement in other production traits is achieved, which is an objective in the other versions of these selection indexes.”**

This shows that there is a strong "movement" within Australian Angus breeders to focus on growth without consideration for mature cow size. It truly shows the disconnect between the seedstock Industry and the commercial Industry.

Cow size drives so many fundamentals in a beef herd that dictate profitability, like fertility, feed costs, drought tolerance (post partum anoestrus interval) and ability to maintain body condition. Our cows are big cows (in our view) at around 650kg in a normal year and they are breed average for MCW. We know what this means in tough years and high stocking rates. The other big issue that is looming in the Beef Industry is our carbon foot print - cow size is directly correlated with feed intake and methane emissions. Selection for moderate sized cows that produce faster growing calves is a key part of reducing our emissions intensity.

All I will say to this is we will stay focused and try to work with seedstock and commercial herds that do understand that feed costs and having a productive, efficient cow herd is the backbone of any beef enterprise and that meat quality (marbling) and yield is important and let the market decide which direction the Angus breed goes in.

# SALE CONDITIONS

## BUYER REBATES FOR OUTSIDE AGENTS

All lots will be sold subject to the usual conditions governing auction sales.

Rebate of 2% is available to outside agents who attend the sale or introduce their client prior to Sale day, and settle on behalf of clients within 7 days. Please email introductions to lawsons@lawsonsangus.com.au and/or the selling agent. If agents are nominated to settle on behalf of clients on Sale day and do not attend 1% rebate will be applied.

## DELIVERY OF SALE BULLS

Lawsons Angus will do our best to assist in the efficient and safe delivery of your bulls. Buyers, please ensure bulls are insured at the fall of the hammer as our insurance does not cover injury of bulls in transit. Please make sure you provide full delivery instructions in writing, including full contact details and maps prior to leaving the Sale. We are offering free Delivery of the Sale Bulls to regional centres in WA. In most cases we will deliver free to the farm address provided. We are also offering free delivery to Yea, Victoria for Eastern States buyers.

## REGISTRATION STATUS AND TRANSFER OF BULLS

Most bulls on offer are Registered Herd Book animals with the Angus Society of Australia (ASA). Registration status of bulls is shown in the catalogue. 'H' indicates the animal is registered in the ASA Herd Book, 'A' indicates bulls are registered with ASA Performance Register (APR). All bulls will be transferred to purchaser at no cost on request.

## 3 YEAR BULL GUARANTEE

All bulls have undergone rigorous and independent assessments for structural soundness and fertility, including a semen test and physical evaluation of the bulls reproductive tract. On top of this we offer the strongest guarantee of any seedstock herd in Australia.

All breeding cattle sold by Lawsons Angus are fertile and structurally sound to the best of our knowledge.

If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 36 months, we will:

1. provide you with a satisfactory replacement if available

OR

2. issue you with a credit equal to purchase price minus salvage value, that may be used to purchase any animal in future Lawsons Angus sales.

The Lawsons Angus 3 year bull guarantee is not an insurance policy. Normal care needs to be taken as we cannot replace an animal that is injured or dies for any reason. We recommend you insure animals against injury.

An insurance service will be available on Sale day. This guarantee is in addition to normal terms and conditions governing auction sales, and as such the discretion and final decision as to issuing a credit will be with the vendor. Any credit will be limited to bull purchase price less salvage value and not include any costs, damages or loss of income incurred as a result of claims under this guarantee.

## ANIMAL HEALTH STATUS OF SALE BULLS

2022 WA Sale bulls have been semen tested by Jessica, Shilling, Bovitech Vet, Albany including a crush side and morphology test.

Bulls exposed to reproductive diseases such as Leptospirosis and Vibriosis can have their reproductive performance impaired and spread disease between the females they are servicing. All bulls offered in this Sale have been vaccinated with Ultravac 7 in 1, Vibrovax and Bovilis MH & IBR.

All bulls offered at this Sale have a J BAS 8 and all cattle are free to travel to all states.

## PESTIVIRUS, 7 IN 1 AND VIBRIO STATUS OF SALE BULLS

Lawsons Angus have been systematically working through a program with Enoch Bergman DVM, Swans Veterinary Services, Esperance, to eradicate Pestivirus from our herd in both WA and Victoria. This involved a combination of screening mobs for antibodies, ear notching testing and vaccinating the mobs that are shown to be negative that have had no previous exposure to a Persistently Infected (PI) animal with Bovine Viral Diarrhea (BVDV), also known as Bovine Pestivirus. BVDV is spread almost exclusively by PI animals and is a costly disease in the industry.

All WA males screened in 2017 were negative and therefore we have vaccinated all bulls and heifers.

## RETENTION OF SEMEN AND CLONING INTERESTS

This year we have selected several bulls as being of particular interest and merit. These bulls are referred to herein as "nominated bulls" and are identified in the catalogue by a shaded box containing the words "Retaining Semen Marketing Rights and 50% Revenue Sharing Interest". Animals in this sale that are nominated to retain a semen interest in are sold with the following conditions;

- Each animal sold is the physical property of the purchaser. The purchaser is entitled to collect semen for use in their own herd only at any time. The purchaser is entitled to 100% of the salvage value of the bull.
- Lawsons Angus retains the right to access the nominated bulls at a future date for the purpose of semen production with the semen to be used within the Lawsons Angus program. Semen will be collected at the expense of

Lawsons Angus and at a negotiated time and place convenient to the new owner and Lawsons Angus.

- Nominated bulls are sold with Lawsons Angus retaining exclusive semen marketing control, and a percentage of all semen royalties is nominated on the individual lot.
- Lawsons Angus may offer any purchaser, being a syndicate, semen company or other, the controlling interest in semen marketing of nominated bulls provided the prospective purchaser nominates their intentions to Lawsons Angus prior to sale, and at that time negotiate ongoing marketing/royalty terms acceptable to Lawsons Angus.
- If a bull is re-sold by a purchaser, Lawsons Angus retained interests persist with the new owner.
- Lawsons Angus retains exclusive cloning rights on all animals sold.
- No animal may be cloned without written consent from Lawsons Angus.

**RETAINING SEMEN INTERESTS IN SALE BULLS ENABLES LAWSONS ANGUS TO OFFER ACCESS TO OUR BEST BULLS AND ENABLES THE BULL OWNER TO JOINTLY SHARE IN ANY FUTURE SUCCESS IN MARKETING SEMEN.**

### RETAINING SEMEN

Retaining a semen interest provides Lawsons Angus with the option to collect semen for our own use, but also to control the potential marketing of semen to the best effect through our network of contacts. Very few bulls ever sell a lot of semen, and in most cases it is later in life after progeny have proven the merit of the bull.

As we put a great deal of resources and intellect into developing each bull, and in some cases into sampling young bulls through AAA and cooperator programs, it is reasonable to participate in their future success in the form of semen sales and use in our own program so we can ensure we continue our program's genetic progress. With these points understood by our customers, we can offer for sale every bull we produce, and hold nothing back. It is important to note most seedstock herds retain their best bulls as stud sires, however the system we operate gives our clients direct access to our best bulls.

### INSURANCE DISCLAIMER

Insurance risk of stud animals sold at auction transfers to the purchaser at the fall of the hammer, including animals remaining on the vendor's property.

Purchasers therefore are advised to insure their animals at the completion of the sale. Stud Animals are not covered by commercial livestock insurance.

### CALVING EASE

We have included a red tick for bulls that are recommended for use over yearling heifers next to the Calving Ease heading in EBV section. Calving ease bull specifications are primarily set at  $\geq -1.0$  for Direct Calving Ease and  $\leq 4.5$  Birth Weight. Individual herds may successfully use bulls outside of this recommended range depending on their herd and production system but these are our recommended "safe" heifer specifications. We also recommend you talk to us about helping develop a pre-calving heifer management plan that can be used in conjunction with these EBV specifications to achieve optimal calving and rebreeding for two year old heifers.

**Below:** Quintarra bred cow and calf.

## GAR ASHLAND

Ashland has been the high use sire at Gardiner Angus Ranch for several years now, he exhibits incredible calving ease, muscle and massive growth in a moderate maturity pattern. Ashland son GAR Home Town sold in 2020 for a record US\$475,000. Ashland offers plenty of mating flexibility from a pedigree stand point.

The #2 ranked bull in the Sale for Heavy Grain Index and in the top 30 for all HBR bulls in the entire 2020 calf crop in Australia and New Zealand calves that are now registered in Australia. Equal #4 ranked bull in the Sale for Domestic Index and 400D Growth, top 1% of the breed for Domestic Index and top 5% for 400D, top 6% for IMF. R311's maternal grand sire, GAR Prophet, is the highest ranked Angus sire in the breed for the new \$GN Indexes.

One of the heaviest boys in the drop, a massive grass converter; backed up by his own performance and his high 400 and 600D Growth EBVs. R321 ranks in the top 1% of the breed for Domestic Index, top 2% for Heavy Grain Index, top 5% for 400D Growth and EMA. Bevan and his team have done a superb job developing these bulls, working his intensive grazing system around everything else he needs to get done. It just shows what can be achieved with efficient genetics and skilled pasture management. Large mobs of bulls take some careful observation and it's been fantastic having these bulls under Bevan's system and watch.

R335 ranks in the top 1% of the breed for Domestic Index, Heavy Grain Index and EMA, top 15% for 400D Growth and top 10% for IMF. We are offering 50 Ashland sons in this Sale, nine of these are out of young elite two and three old Momentum daughters. We do our PLANNED matings around what we think is best for our commercial clients long-term, we don't flip-flop in our objectives and jump to the next fancy looking bull to chase an outcross or because we think his progeny will sell for more money, we let other breeders do that. Our program is boring in the fact it is highly predictable and simply involves identifying and multiplying the best bulls we can find in large numbers. That is how we and in turn you make consistent, predictable genetic progress, not chasing one outcross after another.

Lawsons "Rockstar" R458 is one of the elite young bulls in the entire Angus breed and a potential stud sire, he ranks in the top 20 for all HBR bulls in the entire 2020 calf crop in Australia and New Zealand. Calving ease, massive growth and only a touch above breed average for Mature Cow Weight (MCW) and elite carcase

potential, R458 really does have it all! Ashland really does take our commercial clients to a new level of performance without blowing out cow size. Equal #1 bull in the Sale for Domestic Index (\$D) and 400D Growth, the #1 ranked bull for Heavy Grain Index, top 1% of the breed for \$D and \$GN, top 5% for 400D, top 6% for EMA.

#10 ranked bull in the Sale and top 1% of the breed for Domestic Index and Heavy Grain Index, equal #6 ranked bull in the Sale and top 5% of the breed for 400D and EMA.

The dams of these Sale bulls have settled in well at their new home at Cobwell Station, Barham, NSW.

## GAR BONFIRE

GAR Bonfire continues to be one of the leading GAR Sure Fire sons. Bonfire excels for growth ranking in the top 1% of the breed for all growth traits, his exceptional growth is complimented by him ranking in the top 1% of the breed for all Angus selection indexes. His progeny have ample width and muscle with added frame and great docility.

we see Reliant and his progeny playing a big role in shifting the bell curve for feed efficiency in the years to come. Fantastic growth curve on this R678 and impressive genetic predictions with top 4% of the breed for Domestic Index (\$D) and top 3% for Heavy Grain Index (\$GN). Pedigree going back to Tank and Novak is also inspiring, so much pedigree depth in these boys. Some people talk cow families, we tend to focus on stacking pedigrees with the best sires we can find and producing lots of elite sons and daughters by these sires and then going again!

Youngest bull in the Sale so don't judge him on his actual weight! The only GAR Reliant son in this Sale but you will be seeing more Reliant in the future, they are absolute standout calves, exceptional growth and temperament, long bodied, attractive calves and top 1% of the breed for Net Feed Intake (NFI) so

**GAR GENUINE**

GAR Genuine was one of the sires we selected on our last trip to the US, exceptional calving ease (>10 DIR) and growth, excellent outcross option for all of our clients.

R510 combines two of the best curve benders in the breed in GAR Genuine and GAR profit. Under the new Indexes with significant re-rankings once MCW is reflected as an important economic trait these bulls shot up the charts in rankings. GAR prophet is now the highest ranked sire in the breed for Heavy Grain Index (\$GN) but in fact they rank highly across all the current Indexes. R510 ranks in the top 1% of the breed for Heavy Grain Index and top 2% of the breed for Domestic Index.

To have a bull that is >9 Direct Calving ease (DIR), +120 on 600D and breed average Mature Cow Weight (MCW) is unique in itself without considering the end-product value of these genetics. On last years' Breedplan data we are the only major Angus stud that has maintained MCW under breed average. This is not easy to do and requires a great deal of discipline.

The highest ranked bull on Direct Calving Ease (DIR) at +10.5 but still loads of horsepower at +117 for 600D growth; top 2% of the breed for DIR plus Domestic Index and Heavy Grain Index. We recommend you just look at the calving ease tick when selecting heifer bulls and keep it simple. Those with the red calving ease tick (90% of these Sale bulls) are reliable rock-solid bulls that you can use with heifers with confidence.

This Genuine x Judd bull was one of the heaviest on actuals in December 2021, weighing in at 762kg against the group average of 678kg. R527 ranks in the top 2% percentile of the breed for all calves born in 2020 for Domestic Index and Heavy Grain Index, top 5% for 400D Growth, top 10% for EMA.

Breedplan averages are anchored to the average of calves born in 1985, so we are effectively looking at genetic change since 1985 when we look at EBVs.

R537 is the #7 ranked bull in the Sale and top 1% of the breed for Domestic Index and #9 for Heavy Grain Index, also top 1% of the breed and top 10% for 400D Growth. Don't be suckered into thinking that all Angus are the same and we all use the same bulls, these boys are truly unique on so many levels, this is largely due to the fact we set breeding goals and stick to them no matter how

fancy the bulls look in the semen catalogue brochures, but also we do the hard yards to make it easier for our commercial clients to make continued genetic gains year in year out.

R451 was over 750kg in early December against the group average of 678kg so he has certainly done well on grass and his Breedplan (TACE) figures for 400D and 600D Growth back that up. Another stunning performer out of a two year old daughter heifer that is under breed average mature Cow Weight (MCW). We bang on about MCW as it drives so many fundamentals in a beef herd that dictate profitability, like fertility, feed costs, drought tolerance (post partum anoestrus interval), rebreeding time from calving, ability to maintain body condition. Our cows are big cows and they are breed average for MCW so we know what this means in tough years and high stocking rates.

R478 ranks in the top 5% of the breed for Domestic Index, Heavy Grain Index and IMF. Montalto is one of those bulls that slips under the radar, he's a problem free, no holes bull with exceptional calving ease (+10 DIR) sire, very sound quiet disposition, moderate growth and maturity pattern with excellent carcase traits. Montalto's sire has been used widely across Australia, Montalto is more moderate for Mature Cow Weight (MCW) than his sire and has nearly 400 calves registered now so is high accuracy and recommended as a good outcross.

Out of a first calving heifer R489 is the #2 ranked bull in the Sale for Direct Calving Ease (DIR) at +10.4, top 2% of the breed. DIR is incredibly accurate even though we virtually do not pull a calf these days, except for the odd malpresentation. We recommend you just look at the calving ease tick when selecting heifer bulls and keep it simple. Those with the red calving ease tick (90% of these Sale bulls) are reliable rock-solid bulls that you can use with heifers with confidence. R489 ranks in the top 5% of the breed for Domestic Index and top 8% for Heavy Grain Index.

## ALLOURA GET CRACKING G10

G10 progeny are exceptionally stout, sound moderate frame size. Perfect for production of high quality beef and efficient cows. Get Cracking is one of the elite proven carcass sires and a graduate of the Angus Sire Benchmarking Program (ASBP). Unmatched combination of high IMF (+5.1) and massive EMA (+14.4 EMA), Get Cracking is one of the highest marbling bulls in the Angus breed. G10 had 21 steers in Cohort 4 that went through the ASBP long-fed program at Rangers Valley, his steers were ranked 2nd for MSA Marbling (average MSA marbling score of 571) and 4th ranked for EMA at 85.8 sq cm EMA. G10's real legacy will be his daughters, they are tough, fertile, wide-topped with capacity and a fantastic foundation to breed elite well balanced performance genetics.

A stunning Momentous son here out of a two year old LinkedIn daughter. R318 ranks in the top 25% of the breed for Domestic Index, top 12% for Heavy Grain Index, top 2% for EMA. The impact of Momentous across the breed cannot be overstated, his sons have been topping sales across Australia and his daughters have been breaking seedstock and commercial records. Our two and three year old Momentous daughters are as good as Angus cows come and we have seen lots. Momentous is the only sire in the Angus breed >5 IMF, >12 EMA and >110 600D, he was the highest MSA Marble Score sire-group with his 10 steer progeny in Cohort 9 of the Angus Sire Benchmarking Program (ASBP) and our own carcase trials have seen many >7 marble score carcasses on the rail with only around 120 days on feed.

Equal highest marbling (IMF) bull in the Sale, not surprisingly R448 is a Momentous son. Momentous is the only sire in the Angus breed >5 IMF, >12 EMA and >110 on 600D so really is in a class of his own. R448 ranks in the top 1% of the breed for Heavy Grain Index and marbling (IMF), top 4% of the breed for Domestic Index, top 5% for EMA, top 10% for 400D Growth.

	<b>\$GN</b>	<b>358</b>	<b>\$D</b>	<b>250</b>	<b>\$A</b>	<b>197</b>	<b>\$GS</b>	<b>238</b>	

R554 ranks in the top 10% of the breed for Domestic Index, top 3% for Heavy Grain Index and IMF. Massive marbling potential in these Momentous sons along with his exceptional temperament and structure. It is also worth noting R554 is well below average on MCW. The economic importance and the relationship between MCW, feed intake, feed costs, methane emissions and what we call "bounce-back" or fertility cannot be over emphasised. We have bred over 500 Momentous daughters in our herd and can't say enough good things about them!

	<b>\$GN</b>	<b>345</b>	<b>\$D</b>	<b>245</b>	<b>\$A</b>	<b>198</b>	<b>\$GS</b>	<b>232</b>	

Top 5% of the breed for Domestic Index, top 4% for Heavy Grain Index and IMF, top 6% for EMA along with top 10% for 400D Growth makes R315 pretty unique in terms of where he sits relative to all other Angus calves across Australia in 2020.

## GAR MOMENTUM

Momentum is now regarded as one of the breeds elite calving ease, high carcass merit sires, progeny are stout, moderate frames with exceptionally high EMA and marbling. Sires moderate fertile, easy calving daughters that set the bar for cow efficiency and elite carcass genetics.

R577 ranks in the top 10% of the breed for Domestic Index, top 3% for Heavy Grain Index, IMF and EMA. Momentum has been a game changer in taking a giant step forward in hitting the very top end grids in meat quality and MSA at a younger age with less feed. At the same time Momentum leaves behind him some very hard working, moderate, fertile daughters that epitomize what we can achieve with a disciplined long term plan, many thanks to Gardiner Angus Ranch (GAR) who lead the way and have been key partners now for nearly 30 years.

R602 is the equal #3 IMF bull in the Sale, top 1% of the breed plus top 2% of the breed for Heavy Grain Index and top 10% for Domestic Index and top 5% for EMA. What a fantastic growth curve on this elite Momentum son. Momentum is the sire of Momentous and the highest price yearling bull sold in Australia, Lawson's Rocky R4010 who sold in our NSW Spring 2021 Sale for \$130,000. Momentous has already played a major role in taking the breed to a new level of carcass potential and Rocky has the potential to do the same.

R730 is the equal #3 IMF bull in the Sale, top 1% of the breed plus top 1% of the breed for Heavy Grain Index and top 5% for Domestic Index and top 6% for EMA.

Morande Lake with the Porongurups in the background.

# A BRIEF DESCRIPTION OF EBVS AND \$INDEX VALUES

**The following is a brief description of EBVs and \$Index values and Accuracies. For a more detailed explanation please refer to Angus Society of Australia web site ([www.angusaustralia.com.au](http://www.angusaustralia.com.au)).**

**ACCURACY (%)** ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase.

## **CALVING EASE DIR (%)**

~ Estimates of the genetic differences between animals in the ability of their calves, from 2 year old heifers, to be delivered without assistance.

## **CALVING EASE DTRS (%)**

~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

## **GESTATION LENGTH (DAYS)**

~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

**BIRTH WT (KG)** ~ Estimates of the genetic differences between animals in calf birth weight.

**200-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 200 days of age.

**400-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 400 days of age.

**600-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 600 days of age.

## **MATURE COW WEIGHT (KG)**

~ Estimates of the genetic differences between animals in cow weight at 5 years of age.

**MILK (KG)** ~ Estimates of the genetic differences between animals in milk and animals in percentage retail beef yield, in a 300kg carcase.

## **INTRA-MUSCULAR FAT % (IMF%)**

~ Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcase.

## **NEW SELECTION INDEXES WILL BE INTRODUCED FOR ANGUS SEEDSTOCK CATTLE IN THE DECEMBER 2021 TRANSTASMAN ANGUS CATTLE EVALUATION.**

The new selection indexes replace the current Angus Breeding, Domestic, Heavy Grain and Heavy Grass selection indexes, which have been published since 2014.

Angus Australia's Breed Development & Extension Manager, Mr Andrew Byrne explained that ten selection indexes will now be published for animals within the TransTasman Angus Cattle Evaluation (TACE).

## **ANGUS BREEDING INDEX**

~ Estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability

in the majority of commercial grass and grain finishing beef production systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

**DOMESTIC INDEX** ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

## **HEAVY GRAIN INDEX**

~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

## **HEAVY GRASS INDEX**

~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished heavy steers.
