WELCOME TO OUR 2021 VICTORIAN AND NSW SPRING SALE

WELCOME TO OUR 2021 VICTORIAN AND NSW SALE AT 1PM FRIDAY 17TH SEPTEMBER, HELD AT THE CLAREMONT, YEA, VICTORIA AND BOOROWA, NSW.

THE FIRST 79 BULLS AT YEA WILL BE SOLD THROUGH THE RING AND INTERFACED WITH ELITE LIVESTOCK AUCTIONS FOLLOWED BY THE NSW BULLS THAT BRIAN LESLIE WILL AUCTION FROM YEA, THESE BULLS WILL BE PHYSICALLY LOCATED AT BOOROWA NSW.

With on-going Covid-19 border closures, we find ourselves in the same position as 2020 where time spent visiting clients is a luxury we are not permitted to do. Regardless we are determined to continue to supply elite Angus genetics to the market. We appreciate the on-going support of our clients and hope the next 12 months allows us all more freedom to travel. The good news is that farmers can get travel permits to auctions in both Victoria and NSW, so please check the travel requirements and we are open for inspection any time prior to Sale Day for those that can travel and hopefully as many as possible will make it on Sale day.

2021 Yearling Sale Bulls – 79 in Victoria and 27 in NSW

The Bulls this year are a fantastic line-up of elite, well balanced yearling bulls ready to go to work. All bulls have been semen tested and 93% of the Sale bulls are rock-solid genuine calving ease bulls. These bulls excel in calving ease, growth, moderate mature size and elite carcass genetics. We have 79 bulls catalogued in Victoria and 27 in Boorowa, NSW.

THIS YEAR'S BULLS ARE Sired BY THE WORLD'S LEADING PERFORMANCE ANGUS Sires.

GAR GENUINE

GAR Genuine is another new outcross sire we selected on our last trip to the US in 2019 where he is one of the elite Select Sires bulls and marketed through genetics Australia. He has a big time spread with +10.8 CED and +133 for 600D. Genuine combines two highly proven superior feed efficiency sires KCF Bennet Absolute and MCC Daybreak. We will have feed efficiency data on our first Genuine calves this spring. Progeny are long bodied attractive and suit mating with all our major sire-groups. The 12 Genuine sons in the Sale average +9.0 DIR out to +122 on 600D and +95 MCW, so outstanding curve bending attributes in this new sire-group.

GAR RELIANT

Reliant blows you away with his impressive phenotype, powerful design and gentle disposition. Stacked with maternal strength and feed efficiency with Sure Fire, B/R Destination 727-928 and goes back to one of our all time favourites and big time "influencers" GAR Predestined. Reliant adds lots of power and moderate maturity pattern for that much growth and is at the right end of the bell curve for growth and feed efficiency (NFI).

GAR ASHLAND

Ashland is an incredible calving ease, high growth sire. GAR Ashland is a good outcross for most and one of the high use sires across the US and Australia. Visually attractive and unmatched in his combination of calving ease, growth, marbling and muscle. No other sire we have used have this much muscle in such a stout, moderate frame.

Ashland is the son of the famous GAR Home-Town who sold at the Gardiner Angus Ranch in 2020 for the record price of US\$475,000. There are 18 cracking Ashland bulls in this Sale.

GAR Ashland

LAWSONS MOMENTOUS M518

Momentous is topping bull Sales all over Australia as breeders have realised his unique attributes. You can see why Momentous is now the #2 bull in the Angus breed for registrations with over 2,500 progeny now registered. Over 1,000 of these progeny have been bred in our herd and we literally have hundreds of daughters in full production that are faultless and super fertile. No other sire has the same balance of elite carcass genetics, moderate cow size, calving ease combined with his exceptional docility and structure.

It was pleasing to see his spread between 600D and Mature Cow Weight (MCW) widen with his MCW now +86 and well below breed average.

GAR QUANTUM AND GAR MOMENTUM

The Sale also includes sons (4) of GAR Momentum and GAR Quantum with (3) sons, which are the same sire-group as Momentous. Momentum is the sire of both Momentous and Quantum and one of the game changers in the Angus breed in terms of carcass end-product value and cow efficiency.

Quantum was one of the new bulls we selected in 2019 on our US trip when we secured the exclusive semen rights on him for 12 months, he has similar elite carcass genetics to Momentous and Momentum with similar breed leading EMA (top 1%), but with a bit more horsepower and outstanding docility. It's great having all three options in the AI tank under our PLANNED BREEDING PROGRAM. You can see why Mark Gardiner rated Quantum so highly and is one of their high use sires. The maternal horsepower behind Quantum should not be underestimated.

TE MANIA MONTALTO M1314

There are 15 sons of Te Mania Montalto M1314 that sell, he is super reliable calving ease, very sound and well balanced across the board as well as being an excellent outcross option. Montalto was purchased by King Isle Farms who are also one of our main co-operators that do an incredible job. Montalto has been used extensively by Lawsons Angus and King Isle farms in both commercial and stud operations.

Other sire groups include the Paringa Judd J5, and Allora Get Cracking G10, the carcass legend with outstanding calving ease and moderate Mature Cow Weight (MCW).

All 106 Sale bulls rank at the top end of the Angus breed on many levels including:

- 98/106 (93%) of bulls have a calving ease tick ✓ meaning they ideal to mate with heifers
- Top 32% for Calving Ease Direct (DIR) and lowest 25% for Birth Weight (BW)
- Top 7% of the breed for Heavy Grain Fed Index (GRN), Domestic Index (DOM) and Angus Breeding Index (ABI)
- Top 35% for 600D Growth
- Below Breed average for Mature Cow Weight (MCW top 55%)
- Top 10% for marbling (intramuscular fat)
- Top 10% for Eye Muscle Area (EMA)

A potential elite stud sire here! Note the massive +5.2 IMF, the highest in the Sale and one of the highest in the breed, but he's much more than just high marbling. It's Rocky's unique balance across the board including his muscle pattern, moderate maturity pattern, perfect disposition and faultless structure along with his unique carcass potential that puts him in an elite class of potential stud sires.

We would also like to acknowledge the work that Rob Yelland and his team from Advanced Reproduction have carried out for Lawsons Angus over the last few years.

They have been our reproductive specialists over the years, working at our locations in Victoria, Queensland, and Western Australia.

The work they have done for us includes Fertility Testing of our bulls, Semen Testing, Semen Collection and Processing, Embryo Transfer, Embryo Flushing, IVF Embryo Production, Pregnancy Testing, and large-scale AI programs. Rob and his team have been there to help in any way that they can.

We would like to wish the team at Advanced Reproduction all the best with their business expansion into Northern Australia with centres being established at Rockhampton and Toowoomba, as well as their ongoing operation at Kyabram, servicing southern Australia.

We recommend you speak with the team at Advanced Reproduction to assist you with your reproductive needs.

office@ advancedreproduction.com.au
Rob Yelland 0429 3768 33
John Chapman 0427 933 628

A great line-up of NSW bulls and feature potential stud sire Lawsons Rocky R4010

Vince Rheinberger has done an outstanding job with the NSW 2021 Spring bulls.

We look forward to seeing you in Yea or Booroowa.

SALE CONDITIONS

NOTICE TO BUYERS

All lots will be sold subject to the usual conditions governing auction sales.

Rebate of 3% is available to outside agents who attend the sale or introduce their client prior to Sale day, and settle on behalf of clients within 7 days. Please email introductions to lawsons@lawsonsangus.com.au. If agents are nominated to settle on behalf of clients on Sale day and do not attend 1% rebate will be applied.

DELIVERY OF SALE BULLS

Lawsons Angus will do our best to assist in the efficient and safe delivery of your bulls. This can be arranged by Lawsons Angus at buyers request and at minimal cost. Please note Lawsons Angus do not offer free delivery on bulls but will do our best to minimise the cost. Buyers are welcome to arrange their own delivery or pick of bulls.

REGISTRATION STATUS AND TRANSFER OF BULLS

Most bulls on offer are Registered Herd Book animals with the Angus Society of Australia (ASA). Registration status of bulls is shown in the catalogue.

'H' indicates the animal is registered in the ASA Herd Book, 'A' indicates bulls are registered with ASA Performance Register (APR). Non transfer commercial bulls are denoted 'NT' or 'COM' status.

Registration Transfer of bulls and females should be notified in writing on the Buyer Delivery Instruction form. Bulls will be transferred at no cost. Females will be transferred upon request at the cost of the purchaser. The ASA transfer charges for females is \$22 per head plus GST. These costs will be charged to buyers on top of the purchase price for animals they wish to transfer, unless otherwise specified by buyers on the delivery form.

There is no obligation for commercial buyers to transfer animals.

RETENTION OF SEMEN AND CLONING INTERESTS

This year we have selected several bulls as being of particular interest and merit. These bulls are referred to herein as 'nominated bulls' and are identified in the catalogue by a shaded box containing the words 'Retaining Semen Marketing Rights and 50% Revenue sharing interest'.

Animals in this sale that are nominated to retain a semen interest in are sold with the following conditions:

Each animal sold is the physical property of the purchaser. The purchaser is entitled to collect semen for use in their own herd only at any time. The purchaser is entitled to 100% of the salvage value of the bull.

Lawsons Angus retains the right to access the nominated bulls at a future date for the purpose of semen production with the semen to be used within the Lawsons Angus program. Semen will be collected at the expense of Lawsons Angus and at a negotiated time and place convenient to the new owner and Lawsons Angus.

Nominated bulls are sold with Lawsons Angus retaining exclusive semen marketing control and a percentage of all semen royalties as nominated on the individual lot.

Lawsons Angus may offer any purchaser, being a syndicate, semen company or other, the controlling interest in semen marketing of nominated bulls provided the prospective purchaser nominates their intentions to Lawsons Angus prior to sale, and at that time negotiate ongoing marketing/royalty terms acceptable to Lawsons Angus.

If a bull is re-sold by a purchaser, Lawsons Angus retained interests persist with the new owner. Lawsons Angus retains exclusive cloning rights on all animals sold. No animal may be cloned without written consent from Lawsons Angus.

3 YEAR BULL GUARANTEE

All bulls have undergone rigorous and independent assessments for structural soundness and fertility, including a semen test and physical evaluation of the bulls reproductive tract. On top of this we offer the strongest guarantee of any seedstock herd in Australia.

All breeding cattle sold by Lawsons Angus are fertile and structurally sound to the best of our knowledge.

If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 36 months, we will:

1. provide you with a satisfactory replacement if available
- OR
2. issue you with a credit equal to purchase price minus salvage value, that may be used to purchase any animal in future Lawsons Angus sales.

The Lawsons Angus 3 year bull guarantee is not an insurance policy. Normal care needs to be taken as we cannot replace an animal that is injured or dies for any reason. We recommend you insure animals against injury.

An insurance service will be available on Sale day. This guarantee is in addition to normal terms and conditions governing auction sales, and as such the discretion and final decision as to issuing a credit will be with the vendor. Any credit will be limited to bull purchase price less salvage value and not include any costs, damages or loss of income incurred as a result of claims under this guarantee.

OUR 3 YEAR BULL GUARANTEE IS THE GREATEST WARRANTY PROVIDED BY ANY SEEDSTOCK HERD IN AUSTRALIA.

PLEASE ENSURE THAT YOU PROVIDE SPECIFIC DELIVERY INFORMATION INCLUDING:

- map to your property
- GPS reference mobile
- mobile contact
- email contacts
- any other information which is helpful to ensure efficient delivery.

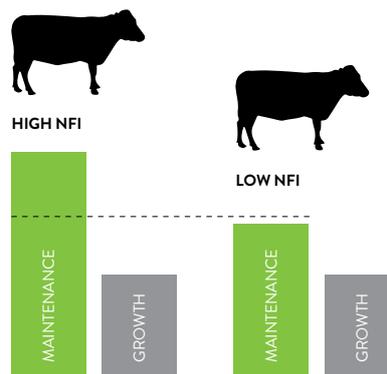

SINCE 1990, GROWSAFE (NOW VYTELLE) HAS APPLIED ADVANCED TECHNOLOGY TO MAKE ANIMAL AGRICULTURE MORE EFFICIENT, ECONOMICALLY VIABLE, AND ENVIRONMENTALLY AND ETHICALLY SUSTAINABLE.

THE PROGRAM

The objective of the Beef Genetics Program is to measure individual animal feed Intake with the Vytelle Feed Intake measurement unit in parallel with growth with the Vytelle Beef® measurement unit (records partial body weights as animals drink) and calculate Net Feed Intake (NFI) to enable selection for the most efficient animals.

This will help us here at Lawsons Angus to raise better bulls that will help make our customers more money with less resources. Since as much as 75% of all production costs comes from feed, a more efficient calf, cow or bull can save you money all year long.

Net feed intake (NFI) is a measure of feed efficiency that is calculated as the difference between an animal's actual feed intake and it's expected feed intake. NFI is independent of body weight and size. Differences in the trait cannot be detected by physically looking at an animal, it requires accurate and simultaneous measurement of an animal's feed intake and body weight. Animals with low NFI values are more efficient than those with high NFI values. These off test contemporary group calculations with 3 generations of pedigree will then be used to calculate NFI EBVs for genetic selection and benchmarking.

MEASURE. MONITOR. PREDICT. OPTIMISE.

Net Feed Intake is a trait that you cannot visually appraise, it must be measured to manage. We have started running NFI trials in 2019. The test is a 49 day duration + 10-14 days warm up. Contemporary groups are built post-weaning with similar breed, sex, age (within 90 days), each animal has a unique EID (electronic identification /NLIS) tag that allows the measurement units to identify it.

Animals are fed the same diet and individual feed intake is measured to a 10-gram resolution by the Vytelle Feed intake measurement units. Partial body weights are taken individually every day, every time the animals come to drink by the GSB measurement unit whose collected data are used to calculate individual predicted daily live weights. Routine weights are collected when animals are handled and this data is correlated during the trial to add to the accuracy and validation of GSB units. The data is collected in a standardised way and at the end of the trial, Vytelle's analytics team calculate individual DMI, ADG and NFI for the cohort as well as providing the genetic evaluations.

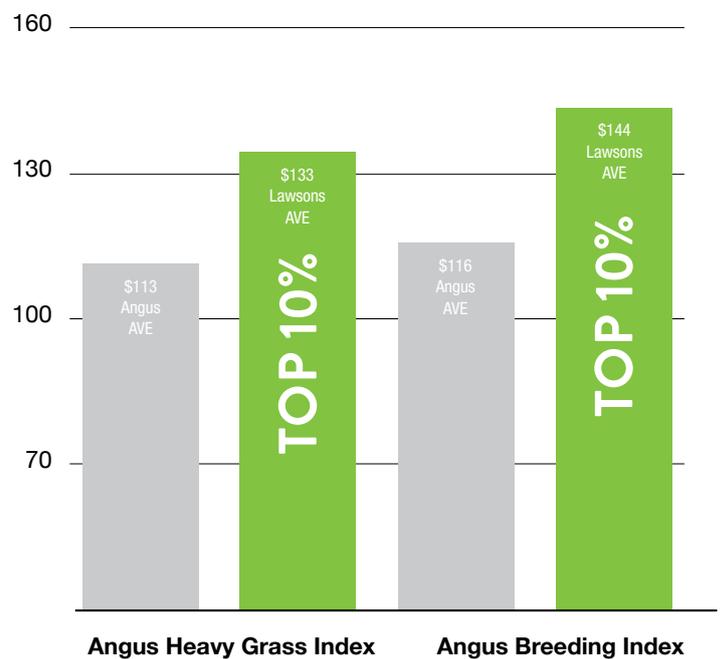

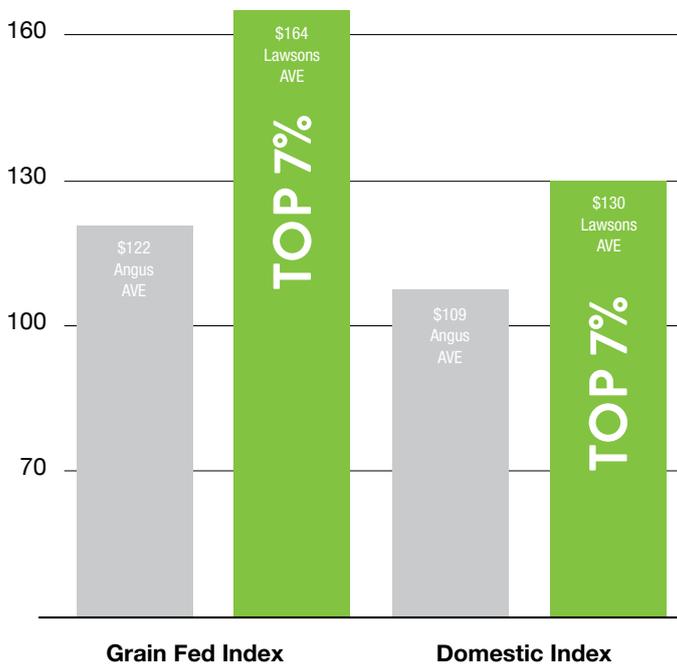

FEED EFFICIENCY: IF YOU DON'T MEASURE IT, YOU CAN'T MANAGE IT.

		
366 KG	WEIGHT	325 KG
1.24 KG/D	ADG	1.23 KG/D
9.58 KG/D (708 KG)	EXPECTED FEED INTAKE	9.29 KG/D (688 KG)
11.04 KG/D (817 KG)	ACTUAL FEED INTAKE	7.95 KG/D (588 KG)
1.46 KG/D (+108)	DIFFERENCE	-1.34 KG/D (-99.2)

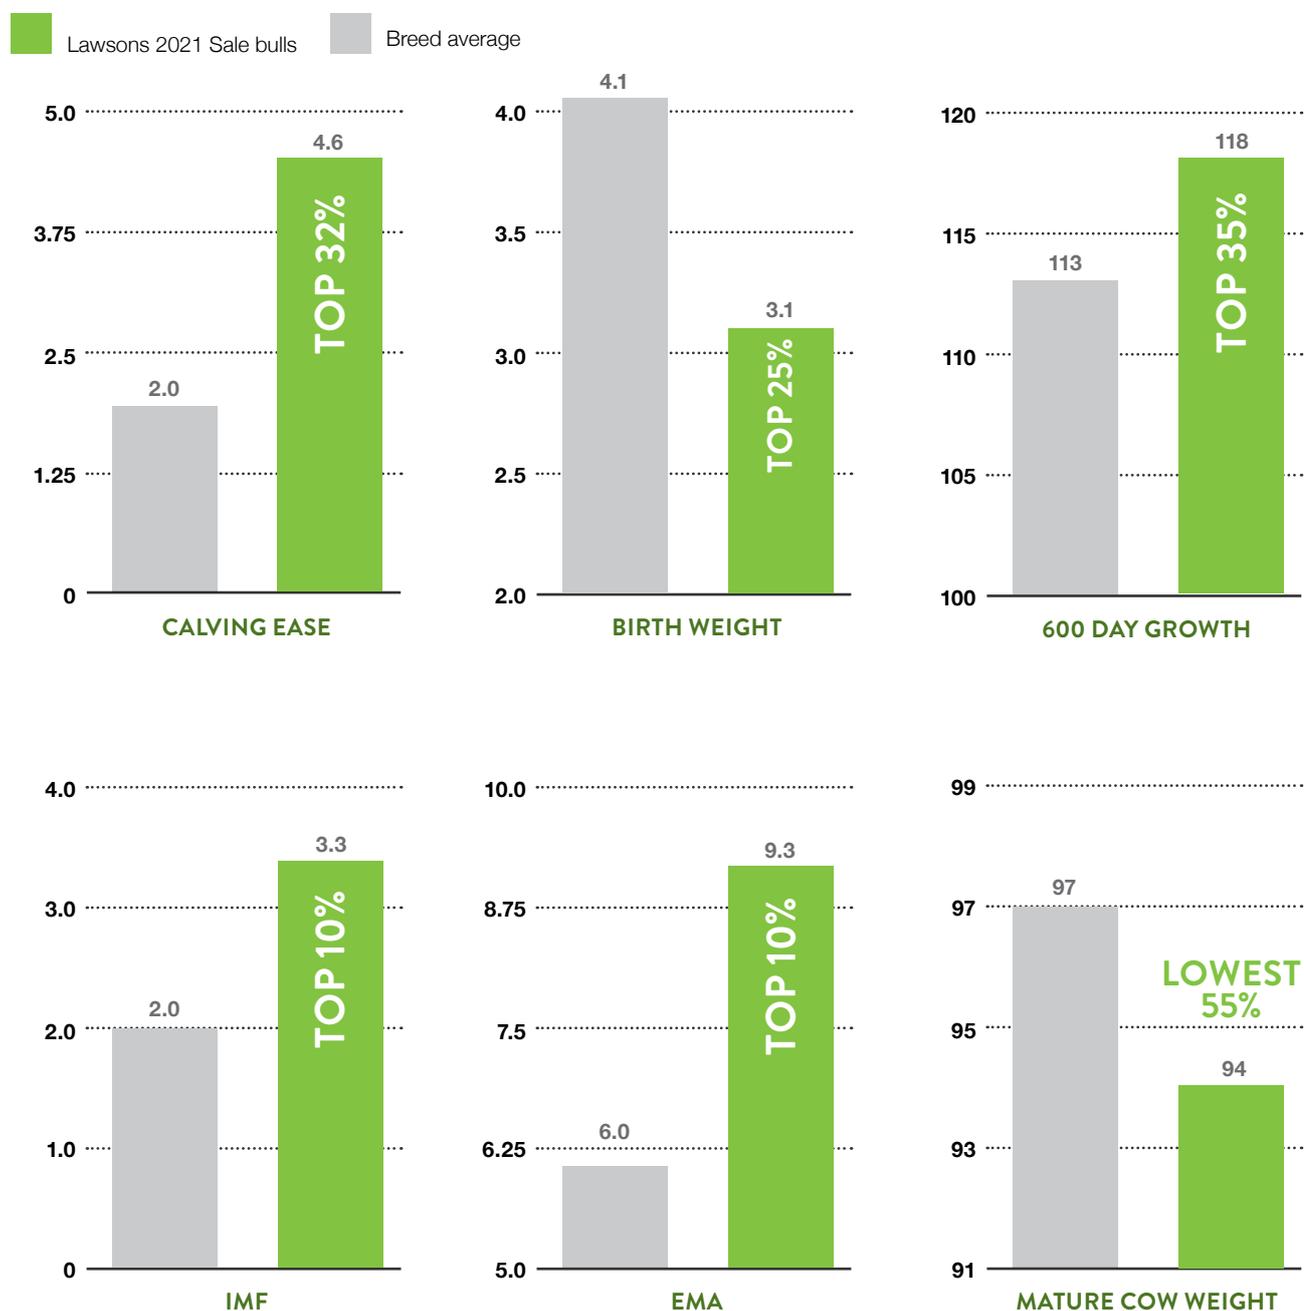

Vytelle beef (GSB) units measure body weight allowing us to record weights on a daily basis – this is a powerful management tool allowing us to track individual and group performance in real time.

LAWSONS ANGUS SALE BULLS SUPERIOR ALL ROUND PERFORMANCE. IT IS SCIENCE NOT FICTION!

REFERENCE SIRES

LAWSONS MOMENTOUS M518

Momentous is an exceptional son of Momentum, outstanding individual that excels in every part of the supply chain. Momentous has been widely used by Lawsons Angus and a popular sire at Genetics Australia. Super sound and exceptional temperament and out of one of our elite donor dams.

GAR MOMENTUM

Momentum is now regarded as one of the breeds elite calving ease, high carcass merit sires, progeny are stout, moderate frames with exceptionally high EMA and marbling. Sires moderate fertile, easy calving daughters that set the bar for cow efficiency and elite carcass genetics.

GAR QUANTUM

A new GAR sire we purchased semen exclusively from in 2019 and one of the most exciting sire prospects from Gardiner Angus Ranch. A son of Momentum, with similar EMA (top 1%) to Momentous and Momentum and top 10% for marbling (IMF). Quantum has more growth than both Momentum and Momentous and progeny excel across the board with excellent docility.

GAR ASHLAND

GAR Ashland is a good outcross for most and one of the high use sires across the US and Australia. Visually attractive and unmatched in his combination of calving ease, growth, marbling and muscle. No other sire we have used have this much muscle in such a stout, moderate frame.

TE MANIA MONTALTO M1314

Photo: Lawsons Montalto Q627

Montalto is a high Indexing well balanced, moderate Berkley son owned by King Isle Farms with excellent calving ease, growth curve and carcass.

GAR GENUINE

GAR Genuine is another new outcross sire we selected on our last trip to the US in 2019 where he is one of the elite Select Sires bulls and marketed through genetics Australia. Big time spread with +10.8 CED and +133 for 600D. Genuine combines two highly proven superior feed efficiency sires KCF Bennet Absolute and MCC Daybreak. We will have feed efficiency data on our first Genuine calves this spring. Progeny are long bodied attractive and suit mating with all our major sire-groups.

GAR RELIANT

Reliant blows you away with his impressive phenotype, powerful design and gentle disposition. Stacked with maternal strength and feed efficiency with Sure Fire, B/R Destination 727-928 and goes back to one of our all time favourites and big time "influencers" GAR Predestined. Adds lots of power and moderate maturity pattern for that much growth.

PARINGA JUDD J5

Judd was purchased by Lawsons Angus and Shaanxi Kingbull (China) as a yearling. Judd has proven himself in our tough contemporaries to match it with the big boys. Progeny are deep bodied, super attractive, slick coated and have exceptionally sound structure. Judd daughters are more moderate than both Berkley and Regent and are showing they can handle the pressure of our system with high stocking rates and large contemporary groups.

ALLOURA GET CRACKING G10

G10 progeny are exceptionally stout, sound moderate frame size. Perfect for production of high quality beef and efficient cows. Get Cracking is one of the elite proven carcass sires and a graduate of the Angus Sire Benchmarking Program (ASBP). Unmatched combination of high IMF (+5.2) and massive EMA (+13.5 EMA), Get Cracking is one of the highest marbling bulls in the Angus breed. G10 had 21 steers in Cohort 4 that went through the ASBP long-fed program at Rangers Valley, his steers were ranked 2nd for MSA Marbling (average MSA marble score of 571) and 4th ranked for EMA at 85.8 sq cm EMA.

RENNYLEA KODAK K522

Kodak is now a highly proven elite carcass and calving ease sire, one of the highest IMF bulls in the breed. Pedigree includes Lawsons Henry VIII Y5, the dam of Regent and Edmund.

GAR Reliant

Exceptional docility and a super attractive, well balanced Reliant son out of a two year old LinkedIn daughter. Reliant is at the right end of the bell curve for growth and feed efficiency (NF). R5025 ranks in the top 5% of the breed for Heavy Grain Index (GRN), EMA and 600D. What a pedigree, including the likes of Predestined, GAR New Design 5050, Paringa Judd J5, Bartel E7 and Tehama Schwarzenegger N600.

Retaining semen marketing rights and 50% revenue sharing interest.

R5167 ranks in the top 5% of the breed for Heavy Grain Index (GRN), top 10% for 600D Growth plus top 7% of the breed for Calving Ease Direct (DIR). Reliant first calves through our feed efficiency testing unit have excelled in Net Feed Intake (NFI) and feed conversion. They certainly have lots of horsepower right from an early age.

Twelve sons of Judd sell in the Sale, they are super sound, quiet, attractive with noticeably smooth coats. We maintain that Judd was the best way to incorporate elite sires Regent and Berkley in our program without blowing out cow size. R1070 ranks in the top 5% percentile of the breed for Heavy Grain Index (GRN).

Momentous is topping bull Sales all over Australia as breeders have realised his unique attributes. The first Momentous son in the Sale, you can see why Momentous is now the #2 bull in the Angus breed for registrations with over 2,500 progeny now registered. Over 1,000 of these progeny have been bred in our herd and we literally have hundreds of daughters in full production that are faultless and super fertile. No other sire has the same balance of elite carcase genetics, moderate cow size, calving ease combined with his exceptional docility and structure. Top 10% of the breed for Heavy Grain Index (GRN) and IMF, top 5% for EMA.

Great looking Judd out of a productive Prophet daughter. R5219 is in the top 10% of the breed for Heavy Grain Index (GRN) and IMF plus up 7% of the breed for Calving Ease Direct (DIR) and well below breed average for Mature Cow Weight (MCW). The reason we place so much emphasis on MCW and keeping our cows moderate is we believe an average Angus cow is big at around 650kg

in our production system and that MCW is the biggest driver of feed costs, drought resistance and an animal's carbon footprint. We like the fact that lowering our emissions is also aligned with economics and sustainability. Given we have the tools to produce fast growing progeny from these moderate cows that reach heavier carcasse weights at a younger age we simply don't agree with the fixation by the Industry that more growth equates to more profit.

Powerful growth curve with moderate MCW. Just qualified for the calving ease tick after consideration for his DIR and BW along with his pedigree, this upstanding Ashland son is out of a two year old Momentum daughter and hit the ground running. These Ashland sons really are unique in their ability to convert grass and attractive muscle pattern and moderate maturity. They get there quickly

and flatten off, which is exactly what we need to produce high quality beef economically, sustainably and to reduce our carbon footprint. R5046 ranks in the top 5% of the breed for EMA, top 10% for IMF. These days you really can have it all if you stay focused and disciplined, the underlying genetic potential is best described by EBVs not how the animal appeals to the eye. That doesn't mean we don't like good looking animals or value the need to understand how to assess things like structure, conformation, maternal ability, docility it's just that these traits should be inherent in any herd. Form follows function as Mark Gardiner often states.

R1046 ranks in the top 5% of the breed for EMA, top 10% for IMF. It's hard to go past this great sire in Momentous and the contribution he is making to the Angus breed, he has taken our herd and the carcass potential of our clients to a whole new level, which is already showing out in MSA grading results across multiple

herds across Australia. Sires like Momentous represent the very top end of the Angus breed and represents over 30 years of selection for superior carcass traits and balanced production traits in our herd. We only get excited about a few bulls out of every thousand we breed as we believe the bulls we test need to be better than what is out there in a global population. Momentous has done the hard yards in his rise to the top and been used widely across 57 herds without a complaint from anyone, which is a rare feat in the bull breeding business!

Top 10% of the breed for Heavy Grain Index (GRN), top 5% for EMA. Three GAR Quantum bulls to sell, Lots 71, 73 and 78. Quantum was one of the new bulls we selected in 2019 on our US trip, similar elite carcass genetics to Momentous and Momentum, but with a bit more horsepower. It's great having all three options in the AI tank under our PLANNED BREEDING PROGRAM. You can see why Mark Gardiner rated Quantum so highly and is one of their high use sires. The maternal horsepower behind Quantum should not be underestimated.

Retaining semen marketing rights and 50% revenue sharing interest.

A potential elite stud sire here! Note the massive +5.2 IMF, the highest in the Sale and one of the highest in the breed, but he's much more than just high marbling. It's Rocky's unique balance across the board including his muscle pattern, moderate maturity pattern, perfect disposition and flawless structure along with his unique carcass potential that puts him an elite class of potential stud sires. Rocky is one of the Sale highlights, this superbly well balanced Momentum son is out of an exceptionally productive two year old Judd daughter with a perfect udder. His pedigree speaks for itself but when you see the likes of Bartel E7, Prophet and Predestined in his foundations and 9 stacked generations of AI sires and tracing back to one of the breeds founding performance sires Ythanbrae S3 there is no surprise that R4010 has the potential to be an elite sire in his own right. Rocky is the equal highest ranked Heavy Grain Index (GRN) and IMF bull in the NSW Sale group, top 1% of the breed for both GRN and IMF and top 5% for EMA. When we talked to Vince about this year's NSW bull team, he was quick to point out that Rocky is the standout and no doubt the best bull he has bred.

Momentous is topping bull Sales all over Australia as breeders have realised his unique attributes. The first Momentous son in NSW group, you can see why Momentous is now the #2 bull in the Angus breed for registrations with over 2,500 progeny now registered. Over 1,000 of these progeny have been bred in our herd and we literally have hundreds of daughters in full production that are faultless and super fertile. No other sire has the same balance of elite carcass genetics, moderate cow size, calving ease combined with his exceptional docility and structure. R4002 ranks in the top 5% of the breed for EMA and IMF.

The highest Direct Calving Ease (DIR) bull in the Sale at +13.2, top 1% of the breed. A Reliant son out of a two year old Kodak daughter that bounced back after the drought. Vince talked about the standout nature of these Reliant calves soon after they hit the deck and used him across his commercial herd and

produced some of the best feeder steers that will enter Rangers Valley this year. Look at the calving ease and growth curve on R4048 and you will start to understand the uniqueness of Lawsons Angus breeding program and our unwavering disciplined approach to breed cattle that really do have it all including looks! R4048 ranks in the top 10% of the breed for Heavy Grain Index (GRN) and EMA, top 5% for IMF.

Massive end-product value here with two all time greats in Momentous x Judd, top 5% of the breed for EMA and IMF plus and top 3% for Calving Ease Direct (DIR) and well below average Mature Cow Weight (MCW) at +56. For those breeders wanting to moderate cow size, R4047 will do that but still kick carcass potential up a few gears and rock solid calving ease.

Michelle Muller, Jamie Hilder and Charlotte Lawson make a great team!

Charlotte and Michelle hard at work in the cattle yards.

A BRIEF DESCRIPTION OF EBVs AND \$INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies. For a more detailed explanation please refer to Angus Society of Australia web site (www.angusaustralia.com.au).

ACCURACY (%) ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase.

CALVING EASE DIR (%)
~ Estimates of the genetic differences between animals in the ability of their calves, from 2 year old heifers, to be delivered without assistance.

CALVING EASE DTRS (%)
~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

GESTATION LENGTH (DAYS)
~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

BIRTH WT (KG) ~ Estimates of the genetic differences between animals in calf birth weight.

200-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 600 days of age.

MATURE COW WEIGHT (KG) ~ Estimates of the genetic differences between animals in cow weight at 5 years of age.

MILK (KG) ~ Estimates of the genetic differences between animals in milk and animals in percentage retail beef yield, in a 300kg carcass.

INTRA-MUSCULAR FAT % (IMF%) ~ Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

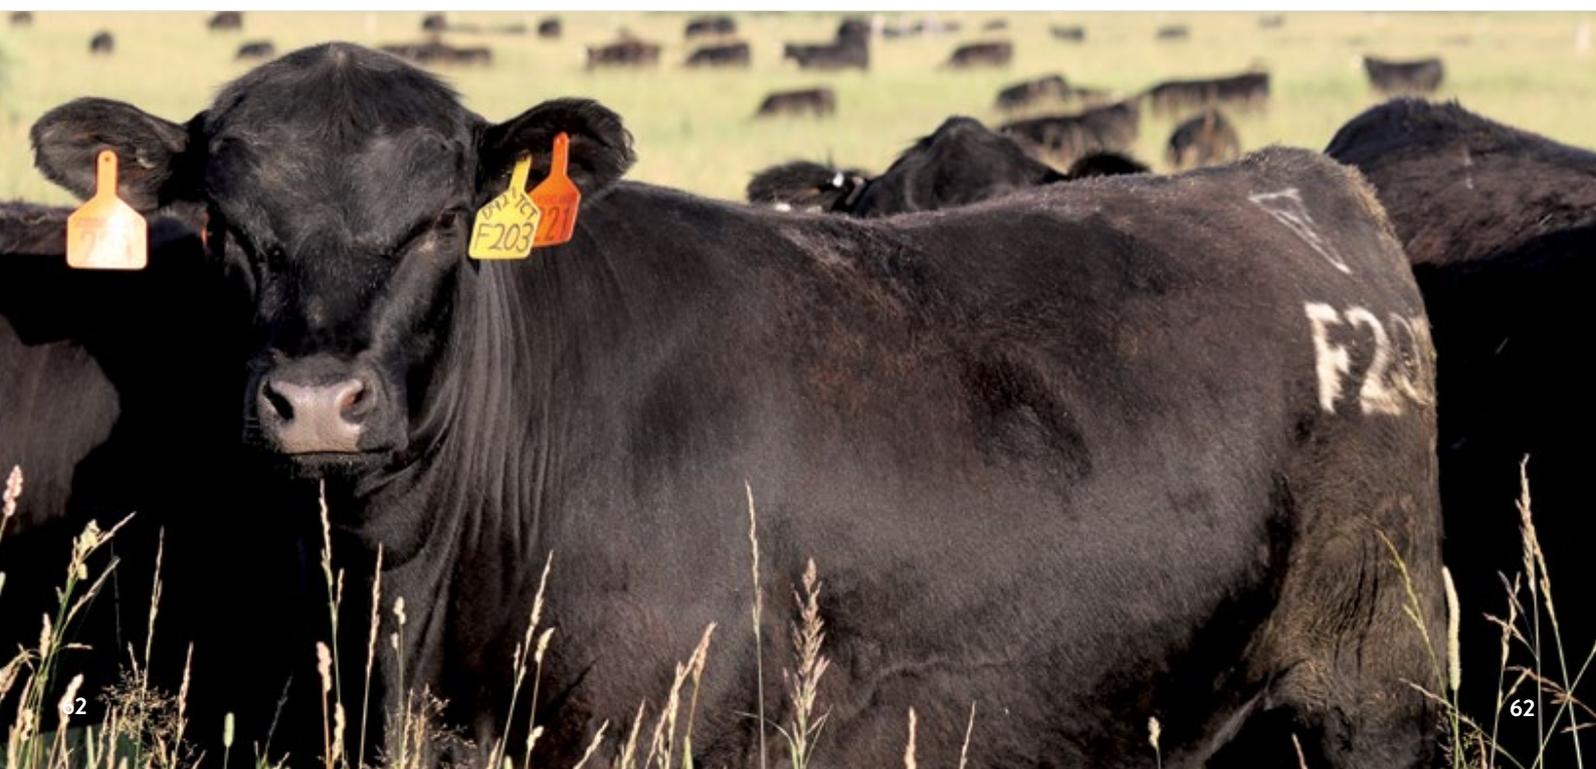

ANGUS BREEDING INDEX
~ Estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals

that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

DOMESTIC INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

HEAVY GRAIN INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

HEAVY GRASS INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished heavy steers.

THE SALE WILL BE HELD AT 'CLAREMONT'

233 COONANS RD, YEA VIC 3717

Lawsons Angus' Bull Unit is located at 233 Coonans Rd, Yea. Claremont is 16km south-west of Yea, 60km north of Whittlesea and 110km north-east of Melbourne Airport. If you are coming from Yea drive south past the Yea Saleyards and turn right into Dairy Creek Rd and left into Coonans Rd. Follow the flags and signs off the Whittlesea-Yea Rd.
