# WELCOME TO OUR ANNUAL 2ND FEBRUARY 2024 ALBANY SALE **100 BULLS SELL**

2024 KICKS OFF AT LAWSONS ANGUS WITH A GROUP OF 100 ELITE 18-MONTH LAWSONS ANGUS BULLS, IN PARTICULAR THE FIRST GROUP OF MOOGINELLA QUINELLA Q33 (50 SONS), GAR TRANSCENDENT (10 SONS) AND HPCA VERACIOUS (6 SONS).

We also have another big run of Home Town sons. We are particularly excited about these bulls from both a genetic and phenotype perspective. The bulls have been developed by Bevan Ravenhill under high stocking rates and rotational grazing from April up until mid-December. It's no easy feat developing and managing large contemporaries of bulls and it takes daily discipline to keep the boys focused on grazing. We had minimal injuries and drop outs this year which is testament to Bevan's attention to detail.

**TABLE 1:** Genetic Comparison between 2024 WA Sale Bulls (101 head) and Angus Breed Average for 2022 born calves.

**We have always maintained our philosophy of producing large numbers of high quality genetics at an affordable price.**

It's obviously a tough year for cow calf breeders after a record breaking 2022. Financially that's hard going and although it will be tempting to take shortcuts with your investment in bulls we urge you keep the genetic progress of your herd rolling through. Unlike commodity process genetics is predictable and cumulative so each generation builds on the last. For example, this year's bulls are an improvement on last years; the new sire-groups allow breeders to make rapid progress across all economic traits without compromise.

We selected Moogenilla Quinella Q33 as a young sire and normally wouldn't use a young sire so heavily in year one, however, the fact that his sire is GAR Fail Safe and his curve bending and carcass attributes were so extraordinary meant we couldn't find a reason not to. Two years later we are very happy with our decision to use him widely and hence the large group of 50 Q33 sons on offer. That early growth and muscle stands out an early age and something we feel will fit well in WA cow-calf production systems.

**Above:** No other sire matches the growth curve and elite carcass potential of Moogenilla Quinella Q33 – 50 sons sell!

**Above:** 2024 Sale Bulls strip grazing at Manypeaks.

**Above:** GAR Transcendent is a big mover in the December TACE genetic evaluation.

The recent December TransTasman Angus Cattle Evaluation (TACE) includes a number of enhancements (full details on Angus Australia web site) and some minor tweaks but also a much greater reliance and emphasis on genomics in the single-step genetic evaluation. One of the big movers was GAR Transcendent who is now +7.7 IMF and +11.4 EMA and extremely well balanced across the board. The other new sire is HPCA Veracious and these boys have some serious horsepower and muscle and another good outcross for WA breeders.

The table above (Table 1) sums up the unique differences in Lawsons Angus breeding program. It's often tougher (and some may say more boring) to stay disciplined and focused on our breeding goals that we feel best suits our diverse clients across Australia. What helps keeps us focused and challenged is our clients. Please study this table and the individual bulls that make up these averages. As Bevan would say the bulls are like peas in a pod so keep your options open, which is easier to do under the helmsman selling system.

**TABLE 2: Bulls That Sell**

## THE LATEST VYTELLE RESEARCH

Cobwell Station is the hub of our 1,500 female nucleus herd where we spend more time with the breeding herd and Yea continues to be the centre for our Eastern States bull development and Vytelle feed testing research facility. From a genetic perspective, we continue to learn and identify large differences between individuals and sires, like the way they utilise feed (energy) and the complex genetics and biological systems that impact these differences. Recent research has demonstrated the repeatability of Net Feed Intake in mature cows.

Measuring and understanding what these changes mean from a production and financial perspective are key to working out what relative importance (selection pressure) we place on these traits in our multi-trait selection decisions. The important trait of Net Feed Intake (NFI) relates to cow maintenance efficiency as well as emissions intensity. We have introduced some new sires in the 2024 breeding season to continue to move the NFI bell curve over a ten year period without giving up the big comparative advantages in terms of predictable calving ease, rapid early growth, fertility, bounce-back and of course elite carcass traits.

It would be remiss not to make mention of the dams of these Sale bulls who battled through the 2022 floods (and again some in 2023) nursing these boys and lost a lot of body condition. They are an incredibly tough, fertile and resilient group of dams. We had a late break at Cobwell Station this year so the cows didn't get an opportunity to recover body condition from the floods, nevertheless, they have bounced back incredibly quickly with very few round 3 returns. We continue our 45 day breeding season with no back-up natural bulls.

**WE ARE TRULY GRATEFUL FOR THE DEDICATION AND HARD WORK OF OUR TEAM AND THE PEOPLE THAT SUPPORT OUR BUSINESS.**

**Above:** Paraway Colt Challenge at Tanbar Station

Many thanks to Bevan and Bec Ravenhill along with their team together with Col and Kerry Thexton for their on-going support, expertise and friendship.

We managed to make it to Tanbar Station in the channel Country with the Thexton family. Charlotte stayed on and worked for three months and thrived in the station environment. Charlotte learnt a lot at Tanbar under the direction of Johnny Tonegato and his team. Ed survived first year University at Lincoln in New Zealand and has been a big help for the summer both at Claremont in Victoria and Cobwell Station in NSW.

Caption: Charlotte, Johnny Tonegato and Russell after a hard day in the yards. RIP Russell who passed away from a snake bite in December, he is missed by all the ringers at Tanbar.

FINALLY I WOULD LIKE TO THANK YOU – OUR CLIENTS – WHO ARE AT THE CENTRE OF EVERYTHING WE DO. FROM DECIDING WHAT OUR MATING'S WILL BE TO HOW WE MANAGE OUR CATTLE, WE ALWAYS THINK ABOUT WHAT OUR CLIENTS NEED.

Regards,

The 2nd February Albany Sale will be the same Helmsman on-line format as last year, using Auctions Plus as the bidding platform. People are welcome to attend and bid on-line from the farm at Manypeaks on Sale Day and/or inspect the bulls prior to the Sale by appointment. Colin Thexton of Independent Rural Agents, Pemberton and the Elders team welcome your enquiries.

# HOW DO **LAWSONS ANGUS ALBANY BULLS** COMPARE TO THE ANGUS BREED AVERAGE?

THESE ALBANY SALE BULLS EXCEL ACROSS ALL KEY ECONOMIC TRAITS. THEY ARE UNIQUE IN THEIR BALANCE OF CALVING EASE, HIGH GROWTH, MODERATE COW SIZE AND UNMATCHED MUSCLE AND HIGH MARBLING POTENTIAL.

█ Lawsons 2024 Sale bulls
 █ Breed average

# HOW DO LAWSONS ANGUS WA SALE BULLS COMPARE TO THE ANGUS BREED AVERAGE?

# NO ONE BENDS IT LIKE A **LAWSONS** **ANGUS BULL**

IN EVERY MATING AT LAWSONS ANGUS THERE IS A FOCUS ON BIRTH WEIGHT (CALVING EASE), GROWTH AND COW SIZE (MCW). OUR BULLS HAVE A MASSIVE GENETIC ADVANTAGE IN THEIR ABILITY TO BEND THE GROWTH CURVE AT BOTH ENDS. NO ONE BENDS THAT CURVE LIKE A LAWSONS ANGUS BULL!

## A LOWER COST, MORE EFFICIENT HERD

Retaining a high proportion of your heifers is a key element to making genetic progress. In order to do this you need to be confident firstly that each year you breed a better 'model' and also that you can confidently calve down a large group of heifers without the stress and economic loss of calving problems (dystocia).

Birth weight is moderately correlated with growth, therefore if we single trait selected for growth we would expect birth weights to increase over time significantly increasing the risk of calving problems associated with higher birth weights. Calving ease is the number one animal welfare trait and as many of our bulls are used over heifers our first priority is always to ensure we provide reliable, predictable information that basically eliminates dystocia.

Around 90% of our bulls are in the optimal zone for calving ease. By weighing calves and submitting data to the global database we find what is referred to as "outliers", which are animals that defy the correlation (i.e. are moderate Birth Weight and still above average or high growth).

## BALANCING GROWTH AND COW SIZE

The Angus breed has become fixated on growth, this has created what we refer to as "cow size creep". As we increase growth we generally see an increase in mature cow size and associated with this is later maturing, later puberty heifers. The challenge for us is then to find the "outliers" that defy the norm and give us the trifecta of calving ease, high growth and moderate mature size/maturity pattern. These animals that defy both antagonisms at either end of the lifetime growth curve are what we call "double curve-benders". The progressive, performance-minded Angus breeders started routinely weighing cows and submitting these weights to Breedplan in the mid-2000's.

We use the information on these key traits from both Australia TACE and the US Angus population. We also continue to contribute to this data by weighing and measuring animals in large contemporary groups in order help identify these true outliers in the breed which excel in our multi-trait criteria.

On-farm productivity and lowering emissions intensity should be our priority for future farming practices. It is possible not to go broke while trying to reduce your carbon footprint! We need to consider the key drivers of both farming profitably and methane emissions.

**The most important and best way to reduce your carbon footprint (as defined by emissions intensity) is to keep your cows moderate and ensure fertility remains your priority.**

Lawsons Angus are one of the only large scale Australian seedstock herds that is below average on Mature Cow Weight (MCW). The reason we place so much emphasis on MCW and on keeping our cows moderate is we believe that MCW is the biggest driver of feed costs, fertility, drought tolerance, post-partum anoestrus period (PPAI) and an animals carbon footprint.

**The Angus breed are the dominant breed for two main reasons, maternal efficiency and eating quality. We need to remain focused on what we do well as a breed and keep marching forward.**

# SALE CONDITIONS

## BUYER REBATES FOR OUTSIDE AGENTS

All lots will be sold subject to the usual conditions governing auction sales.

Rebate of 2% is available to outside agents who attend the sale or introduce their client prior to Sale day, and settle on behalf of clients within 7 days. Please email introductions to lawsons@lawsonsangus.com.au and/or the selling agent. If agents are nominated to settle on behalf of clients on Sale day and do not attend 1% rebate will be applied.

## DELIVERY OF SALE BULLS

Lawsons Angus will do our best to assist in the efficient and safe delivery of your bulls. Buyers, please ensure bulls are insured at the fall of the hammer as our insurance does not cover injury of bulls in transit. Please make sure you provide full delivery instructions in writing, including full contact details and maps prior to leaving the Sale. We are offering free Delivery of the Sale Bulls to regional centres in WA. In most cases we will deliver free to the farm address provided. We are also offering free delivery to Yea, Victoria for Eastern States buyers.

## REGISTRATION STATUS AND TRANSFER OF BULLS

Most bulls on offer are Registered Herd Book animals with the Angus Society of Australia (ASA). Registration status of bulls is shown in the catalogue. 'H' indicates the animal is registered in the ASA Herd Book, 'A' indicates bulls are registered with ASA Performance Register (APR). All bulls will be transferred to purchaser at no cost on request.

## 3 YEAR BULL GUARANTEE

All bulls have undergone rigorous and independent assessments for structural soundness and fertility, including a semen test and physical evaluation of the bulls reproductive tract. On top of this we offer the strongest guarantee of any seedstock herd in Australia.

All breeding cattle sold by Lawsons Angus are fertile and structurally sound to the best of our knowledge.

If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 36 months, we will:

1. provide you with a satisfactory replacement if available
- OR
2. issue you with a credit equal to purchase price minus salvage value, that may be used to purchase any animal in future Lawsons Angus sales.

The Lawsons Angus 3 year bull guarantee is not an insurance policy. Normal care needs to be taken as we cannot replace an animal that is injured or dies for any reason. We recommend you insure animals against injury.

An insurance service will be available on Sale day. This guarantee is in addition to normal terms and conditions governing auction sales, and as such the discretion and final decision as to issuing a credit will be with the vendor. Any credit will be limited to bull purchase price less salvage value and not include any costs, damages or loss of income incurred as a result of claims under this guarantee.

## ANIMAL HEALTH STATUS OF SALE BULLS

2024 WA Sale bulls have been semen tested by Jessica, Shilling, Bovitech Vet, Albany including a crush side and morphology test.

Bulls exposed to reproductive diseases such as Leptospirosis and Vibriosis can have their reproductive performance impaired and spread disease between the females they are servicing. All bulls offered in this Sale have been vaccinated with Ultravac 7 in 1, Vibrovax and Bovilis MH & IBR.

All bulls have been ear notched and tested for pesti virus and have been vaccinated with Pestiguard.

## RETENTION OF SEMEN AND CLONING INTERESTS

This year we have selected several bulls as being of particular interest and merit. These bulls are referred to herein as "nominated bulls" and are identified in the catalogue by a shaded box containing the words "Retaining Semen Marketing Rights and 50% Revenue Sharing Interest". Animals in this sale that are nominated to retain a semen interest in are sold with the following conditions;

- Each animal sold is the physical property of the purchaser. The purchaser is entitled to collect semen for use in their own herd only at any time. The purchaser is entitled to 100% of the salvage value of the bull.
- Lawsons Angus retains the right to access the nominated bulls at a future date for the purpose of semen production with the semen to be used within the Lawsons Angus program. Semen will be collected at the expense of Lawsons Angus and at a negotiated time and place convenient to the new owner and Lawsons Angus.
- Nominated bulls are sold with Lawsons Angus retaining exclusive semen marketing control, and a percentage of all semen royalties is nominated on the individual lot.
- Lawsons Angus may offer any purchaser, being a syndicate, semen company or other, the controlling interest in semen marketing of nominated bulls provided the prospective purchaser nominates their intentions to Lawsons Angus prior to sale, and at that time negotiate ongoing marketing/royalty terms acceptable to Lawsons Angus.

- If a bull is re-sold by a purchaser, Lawsons Angus retained interests persist with the new owner.
- Lawsons Angus retains exclusive cloning rights on all animals sold.
- No animal may be cloned without written consent from Lawsons Angus.

**RETAINING SEMEN INTERESTS IN SALE BULLS ENABLES LAWSONS ANGUS TO OFFER ACCESS TO OUR BEST BULLS AND ENABLES THE BULL OWNER TO JOINTLY SHARE IN ANY FUTURE SUCCESS IN MARKETING SEMEN.**

**RETAINING SEMEN**

Retaining a semen interest provides Lawsons Angus with the option to collect semen for our own use, but also to control the potential marketing of semen to the best effect through our network of contacts. Very few bulls ever sell a lot of semen, and in most cases it is later in life after progeny have proven the merit of the bull.

As we put a great deal of resources and intellect into developing each bull, and in some cases into sampling young bulls through AAA and cooperator programs, it is reasonable to participate in their future success in the form of semen

sales and use in our own program so we can ensure we continue our program's genetic progress. With these points understood by our customers, we can offer for sale every bull we produce, and hold nothing back. It is important to note most seedstock herds retain their best bulls as stud sires, however the system we operate gives our clients direct access to our best bulls.

**INSURANCE DISCLAIMER**

Insurance risk of stud animals sold at auction transfers to the purchaser at the fall of the hammer, including animals remaining on the vendor's property.

Purchasers therefore are advised to insure their animals at the completion of the sale. Stud Animals are not covered by commercial livestock insurance.

**CALVING EASE**

We have included a red tick for bulls that are recommended for use over yearling heifers next to the Calving Ease heading in EBV section. Calving ease bull specifications are primarily set at  $\geq 1.0$  for Direct Calving Ease and  $\leq 4.2$  Birth Weight. Individual herds may successfully use bulls outside of this recommended range depending on their herd and production system but these are our recommended "safe" heifer specifications. We also recommend you talk to us about helping develop a pre-calving heifer management plan that can be used in conjunction with these EBV specifications to achieve optimal calving and rebreeding for two year old heifers.

# REFERENCE SIRES

**MOONGENILLA QUINELLA Q33**

Moogenilla Quinella Q33 is a good match to our maternal herd, rapid early growth without blowing out cow size, excellent carcass traits and top 1-2% across all major Indexes. Progeny are wide-topped, deep-flanked and impressive conformation and an ideal outcross.

**GAR HOME TOWN**

Well known and accepted by WA clients, Home Town is your next step in our pursuit for multi-trait excellence! Home Town sold for a record US\$475,000 in the GAR 2020 Spring Sale and is marketed through Select Sires and World Wide Sires. Home Town progeny are truly unique for calving ease, early growth, stature, maternal function and elite end-product value. His latest new release EBVs put him >14 EMA and >5 IMF, making him one of the most elite carcass bulls in the breed. With now over 1,200 progeny recorded in our herd out of 2,150 progeny recorded in Australia, we have enjoyed watching our two-year-old Home daughters excel in our production system, they are truly magnificent.

**SC ABUNDANCE 42F**

Abundance is an Ashland son that combines exceptional calving ease, high growth and moderate maturity pattern backed up by his curve-bending EBVs and massive muscle and marbling combination. Abundance is a rock-solid calving ease bull that will shine through at weaning and every part of the supply chain - a combination of key traits for beef producers that very few sires can match!

**GAR ASHLAND**

GAR Ashland is a good outcross for most and one of the high-use sires across the US and Australia. Visually attractive and unmatched in his combination of calving ease, growth, marbling and muscle. No other sire we have used have this much muscle in such a stout, moderate frame. Ashland is also the sire of GAR Home Town, GAR Kansas and SC Abundance 42F.

**GAR TRANSCENDENT**

Holy smoke! Transcendent now boasts a +7.7 IMF and everything else well balanced across the board. The latest December TACE analysis with some new enhancements has taken Transcendent to new heights; a highly proven elite, well balanced carcass sire with some outstanding progeny in this Sale. Of his 227 calves registered in Australia, Lawsons Angus have 155 of these recorded in our herd and more to come. Like no other bull in history, Transcendent takes carcass quality to a whole new level with his +7.7 IMF and >11 EMA. Breeding GAR Transcendent to a breed-average marbling female lands the calf in the top 2% of the breed! Equally importantly he does it in a well-balanced way with multi-trait excellence - calving ease, rapid early growth and moderate mature size are critical in today's farming environment.

**LAWSONS MOMENTOUS M518**

Still hard to beat and has had a major impact on the Angus breed in Australia. Momentous is amongst the highest proven carcass sires in the Angus breed a +5.7 IMF, top 1% plus his EMA is +12.4, top 3% of the breed! No other sire in the Angus breed matches Momentous for muscle and marbling. Momentous bull calves have been breaking records across Australia, we have over 1,355 of his 4,376 registered calves in our program, giving you the power numbers to select from with superior genetics at an affordable price. Apart from Momentous unmatched multi-trait excellence his calves are wide-topped, thick set with exceptional docility and structure. We now have 4-year-old Momentous cows in the herd doing a superb job and many sons in this sale are out of Momentous daughters.

**HPCA VERACIOUS**

Veracious was the Lot 1 and high-selling bull from well respected Hinkle's Prime Cut Angus. Veracious a good outcross sire by Mill Brae Identified 4031 out of a GAR Sunrise cow who has an impressive story in her own right. Veracious offers sought-after outcross genes for big-time carcass improvement – no other Angus bull touches his trifecta of Carcass Weight (CW), Marbling and Eye Muscle Area (EMA). and REA.

**GAR RELIANT**

Reliant blows you away with his impressive phenotype, powerful design and gentle disposition. Stacked with maternal strength and feed efficiency with Sure Fire, B/R Destination 727-928 and goes back to one of our all time favourites and big time "influencers" GAR Predestined. Adds lots of power and moderate maturity pattern for that much growth.

## DEVELOP YOUR OWN SIMPLE 10 YEAR PLAN

Using Lawsons Angus genetics will provide a highly predictable path to keeping you a decade ahead of the average Angus breeder.

**Lawsons Angus breeding program is built on multiplying the best bulls available in the world. Sire-Mate helps breeders develop a simple, but still flexible mating plan that minimises inbreeding and maximises genetic gain.**

Top 5% of the breed for Heavy Grain Index (\$GN), top 10% for Domestic Index (\$D) and 400D Growth. You can have it all in this Sale with calving ease, high growth and moderate maturity pattern. These EBVs are not just some abstract numbers, we are comparing these bulls against all other Angus calves born the same year. A lot of planning goes into each mating but also a lot of hard work recording birth weights and data along the journey. Interesting to note the average statistics on these Sale bulls - the 101 bulls average in the top 3% for Heavy Grain Index and 87% are genuine calving ease prospects!

T619 is ranked #2 for 600D in Sale. Near ideal growth curve on T619, just a touch high on BW to earn a calving ease tick but Calving Ease Direct (DIR) well above breed average so some breeders should still consider as a heifer bull prospect. Equal #16 for Heavy Grain Index (\$GN) in the Sale, top 1% of the breed. Top 10% for 400D Growth and top 5% for IMF.

Retaining semen marketing rights and 50% revenue sharing interest.

T965 is a stoutly made, big-butted Home Town x Get Cracking son that puts in together like few bulls in the Angus breed. Incredibly well balanced performance figures that suit all parts of the supply chain. T965 is the highest Heavy Grain Index (\$GN), Domestic index (\$D) and EMA bull in the Sale, top 1% of the breed for \$GN, \$D and EMA! Ideal double curve bender with calving ease, top 10% 400D Growth and well below average on Mature Cow Weight (MCW).

# RETAINING A HIGH PROPORTION OF YOUR HEIFERS IS A KEY ELEMENT TO MAKING GENETIC PROGRESS.

IN ORDER TO DO THIS YOU NEED TO BE CONFIDENT FIRSTLY THAT EACH YEAR YOU BREED A BETTER 'MODEL' BREEDING FEMALE, BUT ALSO THAT YOU CAN CONFIDENTLY CALVE DOWN A LARGE GROUP OF HEIFERS WITHOUT THE STRESS AND ECONOMIC LOSS OF CALVING PROBLEMS (DYSTOCIA).

Bevan enjoying a well earned drink after the sale with Graham Ravenhill (middle) and Trevor Stoney on the left.

Kerry Thexton always flying the flag for us!

# A BRIEF DESCRIPTION OF EBVS AND \$INDEX VALUES

**The following is a brief description of EBVs and \$Index values and Accuracies.**

**The latest Transtasman Angus Cattle Evaluation (TACE) includes some enhancements to the underlying genetic evaluation software and analysis.**

**For a more detailed explanation please refer to Angus Society of Australia web site ([www.angusaustralia.com.au](http://www.angusaustralia.com.au)).**

**ACCURACY (%)** ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase.

**CALVING EASE DIR (%)**  
~ Estimates of the genetic differences between animals in the ability of their calves, from 2 year old heifers, to be delivered without assistance.

**CALVING EASE DTRS (%)**  
~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

**GESTATION LENGTH (DAYS)**  
~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

**BIRTH WT (KG)** ~ Estimates of the genetic differences between animals in calf birth weight.

**200-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 200 days of age.

**400-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 400 days of age.

**600-DAY WT (KG)** ~ Estimates of the genetic differences between animals in liveweight at 600 days of age.

**MATURE COW WEIGHT (KG)** ~ Estimates of the genetic differences between animals in cow weight at 5 years of age.

**MILK (KG)** ~ Estimates of the genetic differences between animals in milk and animals in percentage retail beef yield, in a 300kg carcass.

**INTRA-MUSCULAR FAT % (IMF%)** ~ Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

There are 10 selection indexes currently published under the TACE. We strongly recommend that breeders focus on individual EBVs that best suit their breeding objectives, and look at the indexes as a quick overall snapshot rather than selecting on Index per se.

**We publish the following 4 indexes in our catalogues.**

**ANGUS BREEDING INDEX**  
~ Estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production

systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

**DOMESTIC INDEX** ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

**HEAVY GRAIN INDEX** ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

**HEAVY GRASS INDEX** ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished heavy steers.
